Mr. Jeffrey Michael Meyer VCDC 1840 W Broad Street #200 Richmond, Virginia 23220

Re: Goodson Hills Apartments

Dear Mr. Jeffrey Michael Meyer:

The subject property, known as Goodson Hill Apartments, is a proposed affordable multifamily development to be located on the 1100 Block of Mary Street in Bristol, Virginia. The subject property is proposed to consist of 23 revenue-producing units to be constructed with an allocation of tax credits. The subject property is an open age community.

The subject property is proposed to consist of 23 revenue-producing units including 3-bedroom townhome apartments. A total of 23 units are proposed to be income restricted to 60% of AMI; no units are proposed to be set aside as market rate units; a total of 23 units are proposed to benefit from project-based rental assistance; no units are proposed to benefit from HOME financing. The rent and income restrictions associated with the proposed allocation of tax credits will run for the next 30 years.

The scope of this assignment consists of a comprehensive market analysis for the subject property. The market study was completed in accordance with Virginia Housing, National Council for Housing Market Analyst (NCHMA) guidelines and the Uniform Standards of Professional Practice (USPAP). The completion of this report involved a site visit, interviews with local property managers, and the collection of market data through discussions with persons knowledgeable of the local real estate market.

The purpose, intended use, and function of the report is to assess the marketability of the subject property for tax credit application purposes. This report should not be used for any other purposes without the express written permission of Allen & Associates Consulting.

The report has been generated for the benefit of our client VCDC. Virginia Housing is named as an additional user of the report. No other person or entity may use the report for any reason whatsoever without our express written permission.

A summary of our findings and conclusions is found in the following pages. The conclusions reported are based on the conditions that exist as of the effective date of this report. These factors are subject to change and may alter, or otherwise affect the findings and conclusions presented in this report.

To the best of our knowledge, this report presents an accurate evaluation of market conditions for the subject property as of the effective date of this report. While the analysis that follows is based upon information obtained from sources believed to be reliable, no guarantee is made of its accuracy.

Feel free to contact us with any questions or comments.

Respectfully submitted:

### **EXECUTIVE SUMMARY**

The following is a summary of our key findings and conclusions with respect to the subject property:

#### **Project Description**

The subject property, known as Goodson Hill Apartments, is a proposed affordable multifamily development to be located on the 1100 Block of Mary Street in Bristol, Virginia. The subject property is proposed to consist of 23 revenue-producing units to be constructed with an allocation of tax credits. The subject property is an open age community.

### **Proposed Unit Mix**

The subject property is proposed to consist of 23 revenue-producing units including 3-bedroom townhome apartments. A total of 23 units are proposed to be income restricted to 60% of AMI; no units are proposed to be set aside as market rate units; a total of 23 units are proposed to benefit from project-based rental assistance; no units are proposed to benefit from HOME financing. The rent and income restrictions associated with the proposed allocation of tax credits will run for the next 30 years.

| Proposed Unit Configu | uration |
|-----------------------|---------|
|-----------------------|---------|

| Unit Type / Income Limit / Rent Limit      | HOME | Subsidized | Units | Gross Rent | UA    | Net Rent |
|--|------|------------|-------|------------|-------|----------|
| 3BR-2BA-1344sf / 60% of AMI / 40% of AMI   | No   | Yes        | 2     | \$970      | \$120 | \$850    |
| 3BR-2.5BA-1344sf / 60% of AMI / 50% of AMI | No   | Yes        | 1     | \$970      | \$120 | \$850    |
| 3BR-2.5BA-1344sf / 60% of AMI / 50% of AMI | No   | Yes        | 4     | \$970      | \$120 | \$850    |
| 3BR-2.5BA-1488sf / 60% of AMI / 50% of AMI | No   | Yes        | 2     | \$970      | \$120 | \$850    |
| 3BR-2BA-1489sf / 60% of AMI / 40% of AMI   | No   | Yes        | 1     | \$970      | \$120 | \$850    |
| 3BR-2BA-1489sf / 60% of AMI / 50% of AMI   | No   | Yes        | 1     | \$970      | \$120 | \$850    |

| 3BR-2.5BA-1496sf / 60% of AMI / 60% of AMI | No   | Yes        | 11    | \$970      | \$120 | \$850    |
| Total/Average                              | _    |            | 23    | \$970      | \$120 | \$850    |

### Site Description

The subject property includes an two non-contiguous irregular-shaped parcels consisting of approximately 1.42 acres with approximately 315 feet of road frontage.

A total of 46 privately-owned parking spaces are proposed for the subject property (36 regular / 10 accessible / 2.00 spaces per unit). We normally see 1.5 to 2.0 spaces per unit for projects like this. Public transportation is not found in the immediate area. In our opinion, the proposed parking appears adequate for the subject property.

#### Additional Considerations:

Zoning R-3. Legal, conforming use.

Environmental New construction. No suspected environmental conditions.

Topography No issues detected.

Flood Zone X. Outside the 100-year flood zone.

DDA Status Bristol, Virginia. Not designated as a Difficult to Develop Area.

QCT Status Tract 202.00. Designated as a Qualified Census Tract.

Access Good. Located near a moderately-traveled road. Visibility Good. Moderate volume of drive-by traffic.

In our opinion, the site is suitable for development.

#### **Neighborhood Description**

In our opinion, the subject property has a fair to good location relative to competing properties with respect to neighborhood characteristics.

In our opinion, the subject property has a very good location relative to competing properties with respect to area amenities.

#### Additional Considerations:

Crime Lower crime than market average.

Schools Lower graduation rate than market average.

Average Commute Shorter commute than market average.

In our opinion, the neighborhood is suitable for development.

#### **Primary Market Area**

We defined the primary market area by generating a 25-minute drive time zone around the subject property. We also considered existing concentrations of multifamily properties and the nearest census tract boundaries in our analysis.

The primary market area includes a population of 72,201 persons and covers a total of 469.9 square miles, making it 24.5 miles across on average.

We estimate that up to 20 percent of demand will come from areas outside of the primary market area.

#### **Demogaphic Characteristics**

We anticipate moderate population and household growth for the market area. Renter households are anticipated to increase modestly as well. Finally, we anticipate that rents will grow with CPI over the next few years. Additional details follow:

Population Market area population currently stands at 72,477 and is projected to

grow 0.4 percent this year.

Households Market area households currently stand at 28,896 and is projected to

decline 0.1 percent this year.

Renter Households Market area renter households currently stand at 8,475 and is projected

to decline 0.1 percent this year.

Renter Tenure Market area renter tenure currently stands at 29.3 percent. Rent Growth Market area rents have grown 1.91% annually since 2010.

### Regional Economic Outlook

We anticipate moderate economic growth for the region. Additional details follow:

Est Employment Regional establishment employment currently stands at 48,661 and is

projected to grow 0.4 percent this year.

Civ Employment Regional civilian employment currently stands at 42,127 and is

projected to grow 0.1 percent this year.

Empl by Industry Regional establishment employment currently stands at 48,473. The

data suggests that Retail Trade is the largest employment category accounting for 13.0% of total regional employment. State and Local Government is the second largest category accounting for 12.4% of total employment. Manufacturing is the third largest category accounting for 11.2% of total employment. Health Care and Social Assistance is the fourth largest category accounting for 9.9% of total employment. Accommodation and Food Services is the fifth largest category

accounting for 8.8% of total employment.

Top Employers The top employers include: (1) Food City Distribution Ctr (1001

employees); (2) Johnston Memorial Hospital (687 employees) and; (3)

Walmart Supercenter (550 employees).

# Supply Analysis

Our analysis includes a total of 48 confirmed market area properties consisting of 1,851 units. The occupancy rate for these units currently stands at 94 percent. This rate reflects the occupancy for all confirmed market area units, regardless of project status (stabilized, under construction, proposed, etc.).

The following tables summarize our findings for this market area:

|  |  | ota |  |
|--|--|-----|--|
|  |  |     |  |
|  |  |     |  |

| Project Type | Properties | Units | Vacant | Occupancy |

### Achievable Rents

In the following table we present our concluded achievable rents and rent advantage for the subject property:

| Achievable Rents                           |      |            |       |            |          |           |  |  |
|--|------|------------|-------|------------|----------|-----------|--|--|
| Unit Type / Income Limit / Rent Limit      | HOME | Subsidized | Units | Achievable | Proposed | Advantage |  |  |
| 3BR-2BA-1344sf / 60% of AMI / 40% of AMI   | No   | Yes        | 2     | \$1,550    | \$850    | 45.2%     |  |  |
| 3BR-2.5BA-1344sf / 60% of AMI / 50% of AMI | No   | Yes        | 1     | \$1,550    | \$850    | 45.2%     |  |  |
| 3BR-2.5BA-1344sf / 60% of AMI / 50% of AMI | No   | Yes        | 4     | \$1,550    | \$850    | 45.2%     |  |  |
| 3BR-2.5BA-1488sf / 60% of AMI / 50% of AMI | No   | Yes        | 2     | \$1,550    | \$850    | 45.2%     |  |  |
| 3BR-2BA-1489sf / 60% of AMI / 40% of AMI   | No   | Yes        | 1     | \$1,550    | \$850    | 45.2%     |  |  |
| 3BR-2BA-1489sf / 60% of AMI / 50% of AMI   | No   | Yes        | 1     | \$1,550    | \$850    | 45.2%     |  |  |
| 3BR-2BA-1496sf / 60% of AMI / 50% of AMI   | No   | Yes        | 1     | \$1,550    | \$850    | 45.2%     |  |  |
| 3BR-2.5BA-1496sf / 60% of AMI / 60% of AMI | No   | Yes        | 11    | \$1,550    | \$850    | 45.2%     |  |  |
| Total / Average                            |      |            | 23    | \$1,550    | \$850    | 45.2%     |  |  |

Our analysis suggests an average achievable rent of \$1,550 for the subject property. This is compared with an average proposed rent of \$850, yielding an achievable rent advantage of 45.2 percent. Overall, the subject property appears to be priced at or below achievable rents for the area.

### **NCHMA Demand Analysis**

In the following tables we present our concluded demand, capture rate, penetration rate and absorption period estimates for the subject property using the NCHMA demand methodology:

| Unit Type /<br>Rent Type / Income Limit | Vac Units at<br>Market Entry    | Gross<br>Demand | Vacant &<br>Pipeline Units | •     | Capture Rate<br>Net | Penetration<br>Rate | Absorption Pd<br>(Mos) |
|---|---------------------------------|-----------------|----------------------------|-------|---------------------|---------------------|------------------------|
| 3-Bedroom / Subsidized / 60% of AMI     | 23                              | 4,084           | 6                          | 0.6%  | 0.6%                | 2.9%                | 2                      |
|   | Project-Wide Gross Capture Rate |                 |                            | 0.6%  |                     |                     |                        |
|   | Project-Wide No                 | et Capture Ra   | ate                        | 0.6%  |                     |                     |                        |
|   | Project-Wide Pe                 | enetration Ra   | ite                        | 2.9%  |                     |                     |                        |
|   | Stabilized Occupancy            |                 | 97%                        |       |                     |                     |                        |
|   | Project-Wide Al                 | osorption Per   | riod                       | 2 mos |                     |                     |                        |

In our opinion, the estimated project-level capture rate suggests an appropriate number of units for the subject property. The unit level capture rates suggest an appropriate mix of units for the subject property.

In our opinion, the estimated project-level penetration rate suggest an appropriate number of units for the subject property. The unit-level penetration rates suggest an appropriate mix of units for the subject property.

Our analysis suggests that the subject property will stabilize at 97 percent occupancy. We estimate 2 months of absorption and an average absorption rate of 12.1 units per month for this project. In our opinion, the absorption period suggests an appropriate number and mix of units for the subject property.

It is important to note that this analysis does not account for pent-up demand, pre-leasing efforts or rent concessions. In our opinion, an effective pre-leasing effort could result in a month-for-month reduction in the estimated absorption period for this project. In addition, any concessions or rent subsidies not accounted for already in this analysis could cut capture rates and absorption periods significantly.

# VHDA Demand Analysis

In the following table we present our concluded capture rate and absorption period estimates for the subject property using the VHDA demand methodology:

| Project-Wide Capture Rate - LIHTC Units  | 1.9%  |
|--|-------|
| Project-Wide Capture Rate - Market Units | 0.0%  |
| Project-Wide Capture Rate - All Units    | 1.9%  |
| Project-Wide Absorption Period (Months)  | 2 mos |

# Conclusion

In conclusion, the subject property appears to be feasible from a market standpoint. The units appear to be priced appropriately and we anticipate a rapid lease-up after construction.

Because of the demonstrated depth of demand in this area, we do not believe the construction of this property will have an adverse impact on existing projects in the market area.

### **PROJECT OVERVIEW**

# **Project Description**

The subject property, known as Goodson Hill Apartments, is a proposed affordable multifamily development to be located on the 1100 Block of Mary Street in Bristol, Virginia. The subject property is proposed to consist of 23 revenue-producing units to be constructed with an allocation of tax credits. The subject property is an open age community.

Select project details are summarized below:

| Project Description |                          |  |  |  |  |  |
|---------------------|--------------------------|--|--|--|--|--|
| Property Name       | Goodson Hills Apartments |  |  |  |  |  |
| Street Number       | 1100 Block               |  |  |  |  |  |
| Street Name         | Mary                     |  |  |  |  |  |
| Street Type         | Street                   |  |  |  |  |  |
| City                | Bristol                  |  |  |  |  |  |
| County              | Bristol City             |  |  |  |  |  |
| State               | Virginia                 |  |  |  |  |  |
| Zip                 | 24201                    |  |  |  |  |  |

| Project Type        | Family                   |  |  |  |  |  |
| Project Status      | Prop Const               |  |  |  |  |  |
| Financing Type      | Bond                     |  |  |  |  |  |
| Latitude            | 36.6020                  |  |  |  |  |  |
| Longitude           | -82.1812                 |  |  |  |  |  |

# **Construction and Lease-Up Schedule**

We anticipate a 14-month construction period for this project. Assuming a December 1, 2023 closing, this yields a date of completion of February 1, 2025. Our demand analysis (found later in this report) suggests a 2-month absorption period. This yields a date of stabilization of April 1, 2025.

# **Unit Configuration**

The subject property is proposed to consist of 23 revenue-producing units including 3-bedroom townhome apartments. A total of 23 units are proposed to be income restricted to 60% of AMI; no units are proposed to be set aside as market rate units; a total of 23 units are proposed to benefit from project-based rental assistance; no units are proposed to benefit from HOME financing. The rent and income restrictions associated with the proposed allocation of tax credits will run for the next 30 years.

| Proposed Unit Configuration |         |       |              |                 |               |               |               |                |               |             |
|-----------------------------|---------|-------|--------------|-----------------|---------------|---------------|---------------|----------------|---------------|-------------|

| Total/A                     | Average | 1,448 |              | _               |               |               |               | 23             | \$970         | \$850       |

### **Income & Rent Limits**

The subject property is operated subject to certain income restrictions. The following table gives the applicable income limits for this area:

|            |            |            | Income Limits |            |            |            |
|------------|------------|------------|---------------|------------|------------|------------|
| HH Size    | 30% of AMI | 40% of AMI | 50% of AMI    | 60% of AMI | 70% of AMI | 80% of AMI |
| 1.0 Person | \$14,820   | \$19,760   | \$24,700      | \$29,640   | \$34,580   | \$39,520   |
| 2.0 Person | \$16,920   | \$22,560   | \$28,200      | \$33,840   | \$39,480   | \$45,120   |
| 3.0 Person | \$19,050   | \$25,400   | \$31,750      | \$38,100   | \$44,450   | \$50,800   |
| 4.0 Person | \$21,150   | \$28,200   | \$35,250      | \$42,300   | \$49,350   | \$56,400   |
| 5.0 Person | \$22,860   | \$30,480   | \$38,100      | \$45,720   | \$53,340   | \$60,960   |
| 6.0 Person | \$24,540   | \$32,720   | \$40,900      | \$49,080   | \$57,260   | \$65,440   |
| 7.0 Person | \$26,250   | \$35,000   | \$43,750      | \$52,500   | \$61,250   | \$70,000   |
| 8.0 Person | \$27,930   | \$37,240   | \$46,550      | \$55,860   | \$65,170   | \$74,480   |

Source: HUD; State Housing Finance Agency

The income limits found above were based (in part) on HUD's published median household income for the area. The table below shows how this statistic has increased/decreased over the past several years:

| Historical Median Income |          |        |  |  |  |  |  |  |
|--------------------------|----------|--------|--|--|--|--|--|--|
| Year                     | \$       | Change |  |  |  |  |  |  |
| 2013                     | \$73,300 | 3.4%   |  |  |  |  |  |  |
| 2014                     | \$70,600 | -3.7%  |  |  |  |  |  |  |
| 2015                     | \$70,900 | 0.4%   |  |  |  |  |  |  |
| 2016                     | \$70,500 | -0.6%  |  |  |  |  |  |  |
| 2017                     | \$54,500 | -22.7% |  |  |  |  |  |  |
| 2018                     | \$55,900 | 2.6%   |  |  |  |  |  |  |
| 2019                     | \$55,100 | -1.4%  |  |  |  |  |  |  |
| 2020                     | \$59,100 | 7.3%   |  |  |  |  |  |  |
| 2021                     | \$59,600 | 0.8%   |  |  |  |  |  |  |
| 2022                     | \$69,700 | 16.9%  |  |  |  |  |  |  |
| 2023                     | \$74,600 | 7.0%   |  |  |  |  |  |  |

Source: HUD

The subject property is operated subject to certain rent restrictions. The following table gives the maximum housing expense (net rent limit + tenant-paid utilities) for this area:

Maximum Housing Expense

|           |            |            |            | 1          |            |            |
|-----------|------------|------------|------------|------------|------------|------------|
| Unit Type | 30% of AMI | 40% of AMI | 50% of AMI | 60% of AMI | 70% of AMI | 80% of AMI |
| 0 Bedroom | \$370      | \$494      | \$617      | \$741      | \$864      | \$988      |
| 1 Bedroom | \$396      | \$529      | \$661      | \$793      | \$925      | \$1,058    |
| 2 Bedroom | \$476      | \$635      | \$793      | \$952      | \$1,111    | \$1,270    |
| 3 Bedroom | \$550      | \$733      | \$916      | \$1,100    | \$1,283    | \$1,467    |
| 4 Bedroom | \$613      | \$818      | \$1,022    | \$1,227    | \$1,431    | \$1,636    |
|           |            |            |            |            |            |            |

The following table sets forth the gross fair market rents (net fair market rents + tenant-paid utilities) that would apply to any Section 8 voucher recipients or any units benefiting from HOME financing at the subject property:

Fair Market Rents

| Unit Type | Gross Rent |
|-----------|------------|
| 0 Bedroom | \$583      |
| 1 Bedroom | \$627      |
| 2 Bedroom | \$793      |
| 3 Bedroom | \$1,041    |
| 4 Bedroom | \$1,170    |

### **IMPROVEMENT DESCRIPTION & ANALYSIS**

Our improvement analysis includes an evaluation of the following factors with respect to the subject property: (1) Building Features; (2) Unit Features; (3) Project Amenities, (4) Utility Configuration; and (5) Useful Life Analysis.

## **Building Features**

The subject property is proposed to consist of 23 revenue-producing units in 3 residential buildings and 0 non-residential buildings. The development is proposed to include approximately 33,314 square feet of net rentable area and 36,652 square feet of gross building area.

Additional information regarding the subject property's proposed major building systems is found below.

#### Foundation - Concrete Slab, Basements, Crawl Spaces, etc.

The subject property is proposed to include slab on grade foundations.

### Structural Frame - Floor, Wall, Roof Structural Systems, etc.

The subject property is proposed to be constructed with wood frame surfaced with plywood. Floor/ceiling assemblies are proposed to consist of wood joists & plywood or concrete subfloors. Roof assmeblies are proposed to consist of wood trusses & plywood sheathing.

### Exterior Wall - Exterior Finishes, Doors, Windows, Exterior Stairs, etc.

The subject is proposed to include vinyl siding & brick veneer, single hung vinyl double pane windows, steel clad insulated six-panel unit entry doors, and sliding glass patio doors.

### Roof - Sheathing, Coverings, Warranties, Gutters & Downspouts, Soffit & Fascia, etc.

The subject is proposed to include gabled asphalt shingle roofs.

### Vertical Transportation - Elevator, Interior Stair Systems

The subject property includes three two-story walk up buildings and is not proposed to include elevators.

### Plumbing - Sanitary, Storm, Sewer, Fixtures, Domestic Hot Water

Domestic water piping is proposed to be constructed of CPVC pipe and fittings. Wastewater lines consist of PVC pipe and fittings. Potable hot water is proposed to be supplied via individual electric hot water heaters.

### HVAC - Heating, Air Conditioning, Ventilation

The subject property is proposed to include individual interior-mounted electric heat, individual exterior-mounted a/c compressors with interior-mounted air handlers.

#### Electrical and Communications - Distribution, Aluminum Wiring, etc.

Buildings are proposed to receive electrical power from exterior pad-mounted transformers. Electrical service to units is proposed to consist of 120/240V AC with 100 amps available for each panel. Electrical wiring is proposed to consist of copper. Properly grounded, three-prong outlets are proposed in each dwelling unit. The outlets located in the wet areas are proposed to be Ground Fault Circuit Interrupter (GFCI) outlets. Surface-mounted flourescent & LED fixtures are proposed.

#### Fire Suppression

The subject property is proposed to be equipped with an NFPA-13 fully automatic fire suppression (sprinkler) system. In addition, hard-wired smoke detectors with battery backup are proposed in each bedroom area.

#### **Unit Features**

The subject property is proposed to contain 23 revenue-producing units including 18 regular units and 5 accessible units, including 69 bedrooms, 46 full bathrooms and 18 half bathrooms.

Additional information regarding the subject property's proposed unit features is found below.

### Walls / Ceilings / Interior Doors

Subject property units are proposed to include 8 foot ceilings, painted gypsum wallboard & ceilings, wood solid-core flat panel interior doors and wood solid-core flat panel closet doors.

### Floor Covering

Floor covering is proposed to consist of luxury vinyl plank in the entryways, bathrooms, and kitchens along with wall-to-wall carpeting in the living areas and bedrooms.

#### Kitchens

Kitchens are proposed to include electric four-top ranges, range hoods, frost-free refrigerators, dishwashers, composite wood cabinets, laminated countertops and stainless steel sinks.

#### **Bathrooms**

Bathrooms are proposed to include composite wood vanities, cultured marble countertops, porcelain sinks & toilets, along with fiberglass tubs & surrounds.

## **Project Amenities**

A discussion of the development's proposed project amenities is found below.

### Site & Common Area Amenities

Gazebos/patios and playgrounds are proposed for the subject property.

#### Parking

Open parking is proposed for the subject property.

#### Laundry

Washer/dryer hookups are proposed for the subject property.

### Security

No security amenities are proposed for the subject property.

#### Services

No special services are proposed for the subject property.

Tables comparing the subject property's proposed amenities to that of the most comparable properties are found at the end of this section.

# **Utility Configuration**

The subject property is proposed to include electric heat, electric cooking and electric hot water. All utilities - including cold water, sewer & trash - are proposed to be paid by the resident.

In the table that follows we compare the subject's proposed utility allowances (also known as tenant paid utilities) to the estimated allowances using the HUD Utility Schedule Model:

| Utility Allowances |  |
|--------------------|--|
|--------------------|--|

| BR        | BA   | SF    | Unit Type | Inc Lmt    | Rnt Lmt    | HOME | Subs | Units | UA    | HUD UA |
|-----------|------|-------|-----------|------------|------------|------|------|-------|-------|--------|
| 3         | 2.0  | 1,344 | Townhome  | 60% of AMI | 40% of AMI | No   | Yes  | 2     | \$120 | \$83   |
| 3         | 2.5  | 1,344 | Townhome  | 60% of AMI | 50% of AMI | No   | Yes  | 1     | \$120 | \$83   |
| 3         | 2.5  | 1,344 | Townhome  | 60% of AMI | 50% of AMI | No   | Yes  | 4     | \$120 | \$83   |
| 3         | 2.5  | 1,488 | Townhome  | 60% of AMI | 50% of AMI | No   | Yes  | 2     | \$120 | \$83   |
| 3         | 2.0  | 1,489 | Townhome  | 60% of AMI | 40% of AMI | No   | Yes  | 1     | \$120 | \$83   |
| 3         | 2.0  | 1,489 | Townhome  | 60% of AMI | 50% of AMI | No   | Yes  | 1     | \$120 | \$83   |
| 3         | 2.0  | 1,496 | Townhome  | 60% of AMI | 50% of AMI | No   | Yes  | 1     | \$120 | \$83   |
| 3         | 2.5  | 1,496 | Townhome  | 60% of AMI | 60% of AMI | No   | Yes  | 11    | \$120 | \$83   |
| Total/Ave | rage |       |           |            |            |      |      | 23    | \$120 | \$83   |

The HUD utility allowances are a good measure of the energy costs for a given property. Our analysis suggests that the proposed utility allowances are higher than those established using the HUD model.

Tables comparing the subject property's utility configuration to that of the most comparable properties are found at the end of this section. Outputs from the HUD Utility Schedule Model are also found there.

# **Useful Life Analysis**

We anticipate a useful/economic life of 50 years for this development, assuming that appropriate replacement reserves are established for this property.

In the course of completing this study, we rated the condition of the subject property and the most comparable properties on a 1-5 scale (1 being the worst and 5 being the best). We also evaluated the actual and effective ages of the subject and select comparables. A table summarizing our findings is found below:

| Actual Age   Effective Age   Condition |                                    |               |                  |                       |               |                  |                       |  |  |  |

### SITE DESCRIPTION & ANALYSIS

Our assessment of the site included an evaluation of the following factors with respect to the subject property: (1) Survey; (2) Site Plan; (3) Nuisances, Hazards, Detrimental Influences & Environmental; (4) Topography; (5) Flood Zone; (6) Difficult to Develop Area Status; (7) Qualified Census Tract Status; and (8) Traffic Patterns, Access & Visibility.

## Survey

A survey for the subject property was provided to the analyst for review. Current surveys should be evaluated to ascertain whether there are any easements encumbering the subject property. Our review/inspection suggested that the site is currently encumbered by standard utility easements that do not adversely affect its marketability and that the site is serviced by municipal utilities.

### Site Plan

A site plan for the subject property was provided to the analyst for review. Site plans are necessary to analyze the site improvements, parking configuration, internal traffic flow, location of building improvements and landscaping improvements for the subject property. Our review did not identify any problem areas with respect to the subject property. A summary of the development's site features is found below.

# Acres / Lot Shape / Frontage

The subject property includes an two non-contiguous irregular-shaped parcels consisting of approximately 1.42 acres with approximately 315 feet of road frontage.

# Zoning

According to the sponsor, the subject property is currently zoned R-3. It is our understanding that the current zoning for the subject is a legal, conforming use.

### Parking / Streets / Curbs / Sidewalks

A total of 46 privately-owned parking spaces are proposed for the subject property (36 regular / 10 accessible / 2.00 spaces per unit). We normally see 1.5 to 2.0 spaces per unit for projects like this. Public transportation is not found in the immediate area. In our opinion, the proposed parking appears adequate for the subject property.

### <u>Dumpsters / Dumpster Enclosures</u>

The subject is proposed to include 2 publicly-owned dumpsters along with 2 privately-owned wood enclosures.

### Landscaping / Perimeter Fence / Retaining Walls / Entry Sign

Trees, shrubs & lawns are proposed for the subject property. A perimeter fence is not planned at the subject property. Retaining walls are not planned at this property. One unlighted entry sign is proposed for this property.

#### Stormwater Management / Site Lighting / Water Service / Wastewater Service

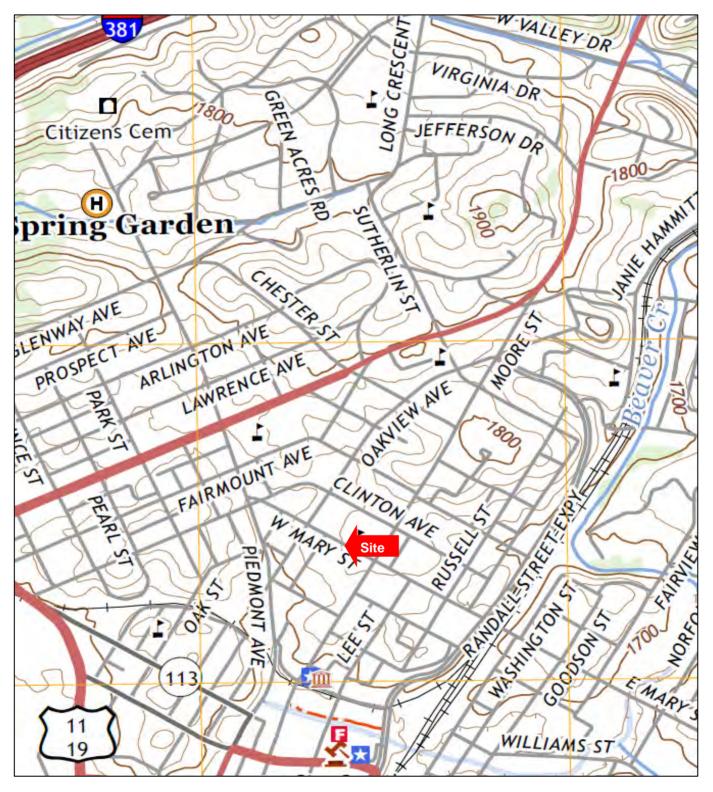

Stormwater management is proposed to consist of catch basins and concrete pipe connecting to a public system. Site lighting is proposed to consist of publicly-owned HID poles. Domestic water service to buildings is proposed to consist of ductile iron pipe connecting to a public system. Wastewater service to buildings is proposed to consist of PVC pipe connecting to a public system.

## Nuisances, Hazards, Detrimental Influences & Environmental

We did not observe any nuisances, hazards, detrimental influences or recognized environmental conditions on our inspection of the subject property. Nevertheless, we recommend that the sponsor obtain a comprehensive environmental assessment from a qualified professional.

# **Topography**

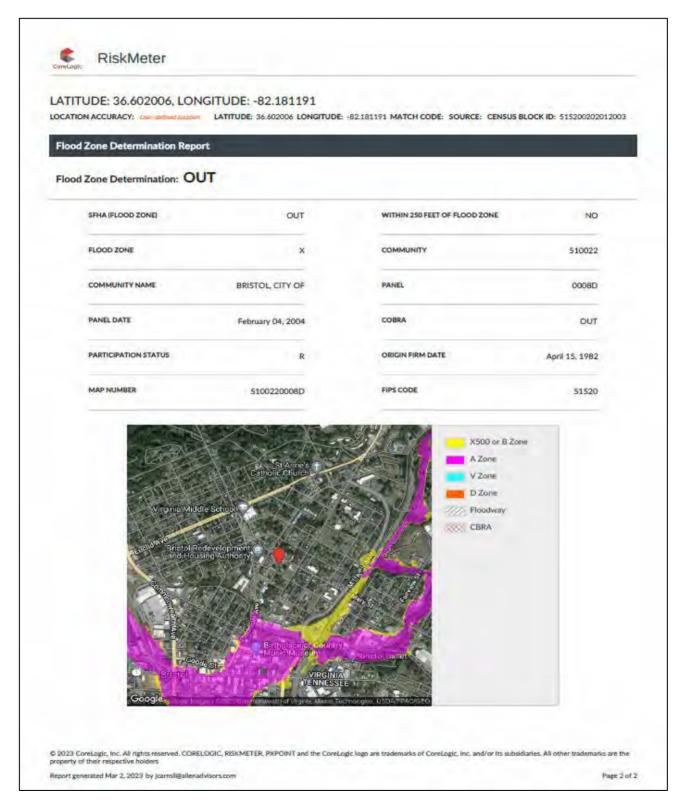

The USGS map showing the topography of the subject property and surrounding area is found below:

The topographic map shows that the site is flat and drains to adjacent properties to the south. In our opinion, there do not appear to be any topographic issues with respect to the subject property.

### Flood Zone

The map showing the location of the subject property relative to nearby areas prone to flooding (identified in purple) is found below:

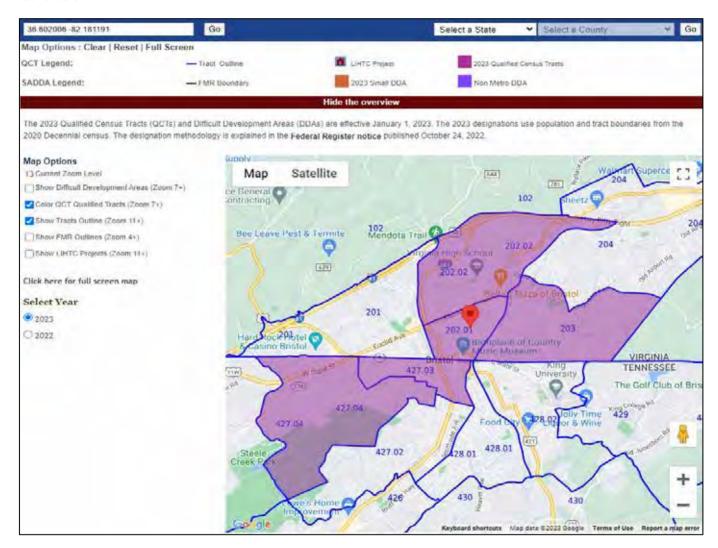

According to FEMA map number 5100220008D dated February 04, 2004, the subject property is located in Zone X. This is an area that is identified as being located outside the 100-year flood zone.

## **Difficult to Develop Area Status**

The subject proprterty is located in Bristol, Virginia - an area that is not designated as a Difficult to Develop Area. Consequently, the subject property does not appear to qualify for special DDA funding under state and federal programs.

### **Qualified Census Tract Status**

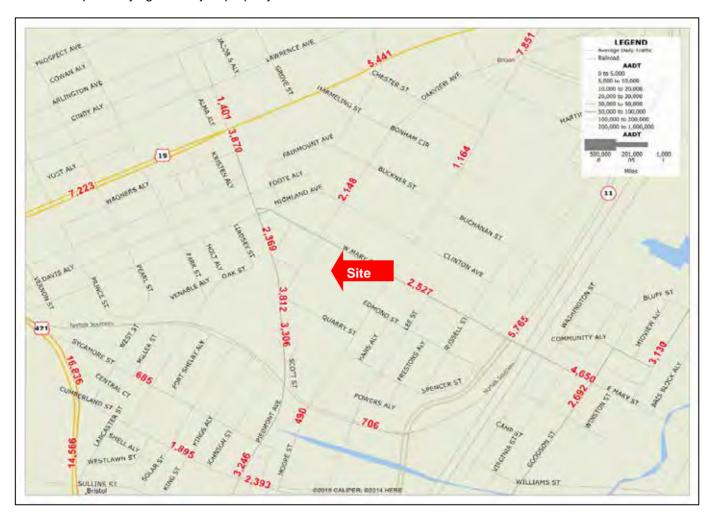

The federal government has identified census tracts throughout the United States that include high concentrations of low-income households and substandard housing units. These areas, known as Qualified Census Tracts, qualify for special funding under various state and federal programs. A QCT map showing the location of the subject property is found below:

The subject property is located in Census Tract 202.01 - an area that is not designated as a Qualified Census Tract. Consequently, the subject property does not appear to qualify for special QCT funding under state and federal programs.

## Traffic Patterns, Access & Visibility

A traffic map identifying the subject property is found below:

#### Access

The subject property is located approximately 2 blocks east of Piedmont Avenue in Bristol, Virginia. Piedmont Avenue is a moderately-traveled north-south road carrying approximately 3,500 vehicles per day. We did not observe any road or infrastructure improvements taking place in the immediate vicinity of the subject property. In our opinion, therefore, accessibility is good by virtue of the location of the subject property relative to existing streets and thoroughfares.

### Visibility

The subject property is not visible from Piedmont Avenue with significant frontage and a moderate volume of drive-by traffic. Consequently, in our opinion visibility is good by virtue of the exposure of the subject property to existing drive-by traffic volumes.

In the course of completing this study, we rated the access and visibility for the subject property and the most comparable properties on a 1-5 scale (1 being the worst and 5 being the best). A table summarizing our findings is found below:

Access & Visibility

|     | Rating                             |        |            |        |            |  |  |  |  |

### **NEIGHBORHOOD DESCRIPTION & ANALYSIS**

## Neighborhood

Our assessment of the neighborhood includes an evaluation of the following factors with respect to the subject property: (1) Life Cycle; (2) Surrounding Properties; (3) Economic Characteristics; (4) Crime Rates; (5) Educational Attainment; and (6) Commuting Patterns.

### Life Cycle

Neighborhoods are sometimes thought to evolve through four distinct stages:

- Growth A period during which the area gains public favor and acceptance.
- Stability A period of equilibrium without marked gains or loses.
- Decline A period of diminishing demand.
- Revitalization A period of renewal, redevelopment, modernization, and increasing demand.

Based on our evaluation of the neighborhood, the subject property is located in an area that appears to be in the stability stage of its life cycle. Modest population growth is anticipated for the next several years.

### **Surrounding Properties**

The subject property is located in Bristol, Virginia. The immediate area consists of residential land uses.

Multifamily is located to the north; Multifamily is located to the south; Church is located to the east; and Multifamily is located to the west of the subject property.

Surrounding property uses are summarized in the table found below:

Surrounding Properties

|           | 9 1         |           |
|-----------|-------------|-----------|
| Direction | Use         | Condition |
| North     | Multifamily | Good      |
| South     | Multifamily | Good      |
| East      | Church      | Good      |
| West      | Multifamily | Good      |
|           |             | -         |

Source: Allen & Associates

### **Economic Characteristics**

The subject property is located in an area with average household incomes of \$9,516 (in constant 2015 dollars); this is compared with \$30,814 for the most comparable properties included in this analysis.

In addition, the subject property is located in an area with median cash rents of \$286 (in constant 2015 dollars); this is compared with \$583 for the most comparable properties included in this analysis.

Finally, the subject property is located in an area with median single family home values of \$54,200 (in constant 2015 dollars); this is compared with \$105,885 for the most comparable properties included in this analysis.

## Crime Rates

The subject property is located in an area with personal crime rates of 1.4%. Personal crime includes offenses such as rape, murder, robbery and assault. Our research suggests that the average personal crime rate for the most comparable properties stands at 2.8%.

In addition, the subject property is located in an area with property crime rates of 3.0%. Property crimes include offenses such as burglary, larceny and theft. Our research suggests that the average property crime rate for the most comparable properties stands at 4.5%.

Please note: The crime statistics included in this analysis are historical area-wide figures. These statistics make no consideration for changing demographics or the implementation of an affirmative crime prevention program at the subject property.

#### **Educational Attainment**

The subject property is located in an area with high school graduation rates of 62.7%; this is compared with 74.4% for the most comparable properties included in this analysis.

In addition, the subject property is located in an area with college graduation rates of 5.9%; this is compared with 16.5% for the most comparable properties included in this analysis.

### **Commuting Patterns**

The subject property is located in an area with an average drive to work of 17.8 minutes; this is compared with 21.1 minutes for the most comparable properties included in this analysis.

In addition, the subject property is located in an area with an average of 0.79 vehicles per household; this is compared with 1.36 vehicles per household for the most comparable properties included in this analysis.

#### Conclusion

In our opinion, the subject property has a fair to good location relative to competing properties with respect to neighborhood characteristics.

# **Proximity to Area Amenities**

Our assessment included an evaluation of the proximity of various amenities to the subject and the most comparable properties. We looked at the following amenities in our analysis: (1) Banks; (2) Grocery; (3) Emergency Clinics; (4) Pharmacies; and (5) Discount Stores.

A listing of some of the area amenities is found below. An amenity map is found in the following pages:

|                   | Proximity to Area Amenities |       |
|-------------------|-----------------------------|-------|
| Amenity           | Name                        | Miles |
| Bank              | First Community Bank        | 0.7   |
| Grocery           | Food City                   | 0.7   |
| Emergency Clinic  | Care Clinic                 | 1.8   |
| Pharmacy          | Food City Pharmacy          | 0.7   |
| Discount Store    | Ollie's Bargain Outlet      | 0.8   |
| Elementary School | Washington-Lee Elementary   | 0.8   |
| Middle School     | Virginia Middle School      | 0.3   |
| High School       | Virginia High School        | 1.0   |
| Bus Stop          | -                           | -     |

Source: Google Maps

First Community Bank, Food City, Food City Pharmacy, and Ollie's Bargain Outlet are all located less than 0.8 miles away from the subject property. Care Clinic is located 1.8 miles away.

#### Number of Area Amenities

We utilized Microsoft MapPoint to evaluate the subject and the most comparable properties with respect to the number of amenities in the immediate area.

- Microsoft MapPoint identified 22 banks within 2.0 miles of the subject property. The subject is ranked 2 out of the 13 properties included in this analysis.
- A total of 16 grocery stores are in the vicinity of the subject property. The subject is ranked 1 for the
- A total of 0 hospital are in the vicinity of the subject property. The subject is ranked 5 for the area.
- A total of 9 pharmacies are in the vicinity of the subject property. The subject is ranked 2 for the area.
- A total of 50 shopping establishments are in the vicinity of the subject property. The subject is ranked 2 for the area.

#### **Nearest Area Amenities**

We utilized Microsoft MapPoint to evaluate the subject and the most comparable properties with respect to the nearest area amenities.

- According to Microsoft MapPoint, the nearest bank is 0.33 miles away from the subject property. The subject is ranked 2 out of the 13 properties included in this analysis.
- The nearest grocery store is 0.27 miles away from the subject property. The subject is ranked 3 for the area.
- The nearest hospital is 4.09 miles away from the subject property. The subject is ranked 9 for the area.
- The nearest pharmacy is 0.53 miles away from the subject property. The subject is ranked 4 for the area.
- The nearest shopping center is 0.38 miles away from the subject property. The subject is ranked 5 for the area.

### Conclusion

In our opinion, the subject property has a very good location relative to competing properties with respect to area amenities.

Tables comparing the subject property's proximity to area amenities to that of the most comparable properties is found on the next page. Maps showing the proximity of the subject property to area amenities and area employers is also found in the following pages.

In the course of completing this study, we rated the neighborhood and the proximity to area amenities for the subject property and the most comparable properties on a 1-5 scale (1 being the worst and 5 being the best). The tables on the following pages give these ratings.

### **MARKET AREA**

### Overview

Market areas are influenced by a variety of interrelated factors. These factors include site location, economic, and demographic characteristics (tenure, income, rent levels, etc.), local transportation patterns, physical boundaries (rivers, streams, topography, etc.), census geographies, and the location of comparable and/or potentially competing communities.

In areas where the county seat is the largest city, centrally located, and draws from the entire county, the county may be the market area. In the case where there are potentially competing communities in one county, the market area may be part of the county. In fact, the market area could include portions of adjacent counties. In this case, a combination of county subdivisions may be used to define the market area. In urban or suburban areas, the market area will be adjacent to the site extending to all locations of similar character with residents or potential residents likely to be interested in the project. In this case, county subdivisions, townships, or a combination of census tracts may be used to define the market area.

Allen & Associates recently conducted a series of property management interviews to better understand market areas and resident moving patterns for multifamily properties. Our study suggested that markets may be classified into the following general categories: urban, suburban and rural. Renters in urban markets are typically willing to move 5 to 10 minutes when looking for a new apartment. Our research also shows that renters in suburban markets are normally willing to move 10 to 15 minutes when looking for a new place to live. Renters in rural markets are typically willing to move 15 to 20 minutes when looking for a new apartment. We considered these general guidelines in our evaluation of the subject property.

Our study suggested that secondary market areas were generally a function of whether the proposed development was family or elderly. Our research suggested that secondary market demand for family properties ranged from 10 to 30 percent. Secondary market demand for elderly properties ranged from 10 to 50 percent. Although seniors move less frequently than younger renters, they are often willing to move longer distances when looking for housing. We considered these general secondary market guidelines in our evaluation of the subject property.

Our primary and secondary market area definitions are found below.

# **Primary Market Area**

We defined the primary market area by generating a 25-minute drive time zone around the subject property. We also considered existing concentrations of multifamily properties and the nearest census tract boundaries in our analysis.

Primary market area, drive time and existing multifamily maps are found in the following pages. The primary market area included all or part of the following census tracts:

| Census Tract | County            | State    |
|--------------|-------------------|----------|
| 51169030500  | Scott County      | Virginia |
| 51169030600  | Scott County      | Virginia |
| 51191010100  | Washington County | Virginia |
| 51191010200  | Washington County | Virginia |
| 51191010300  | Washington County | Virginia |
| 51191010401  | Washington County | Virginia |
| 51191010402  | Washington County | Virginia |
| 51191010501  | Washington County | Virginia |
| 51191010502  | Washington County | Virginia |
| 51191010601  | Washington County | Virginia |
| 51191010602  | Washington County | Virginia |
| 51191010700  | Washington County | Virginia |
| 51191010800  | Washington County | Virginia |
| 51191010900  | Washington County | Virginia |

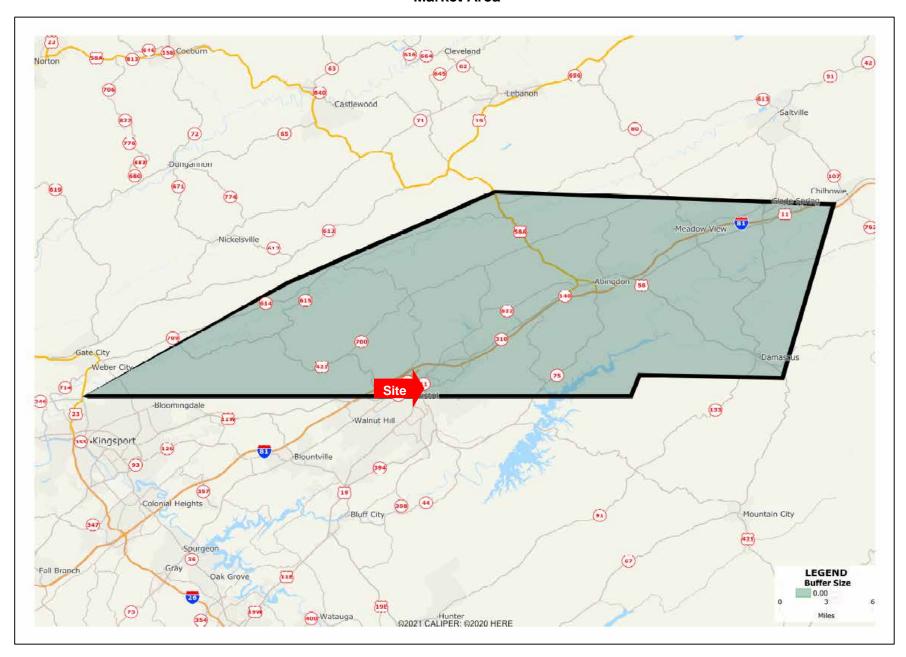

| 51191011000 | Washington County | Virginia |
|-------------|-------------------|----------|
| 51520020100 | Bristol city      | Virginia |
| 51520020200 | Bristol city      | Virginia |
| 51520020300 | Bristol city      | Virginia |
| 51520020400 | Bristol city      | Virginia |

The primary market area includes a population of 72,201 persons and covers a total of 469.9 square miles, making it 24.5 miles across on average.

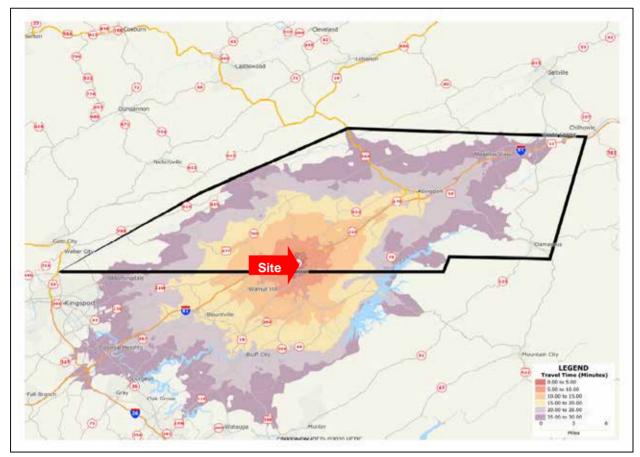

# **Secondary Market Area**

We estimate that up to 20 percent of demand will come from areas outside of the primary market area.

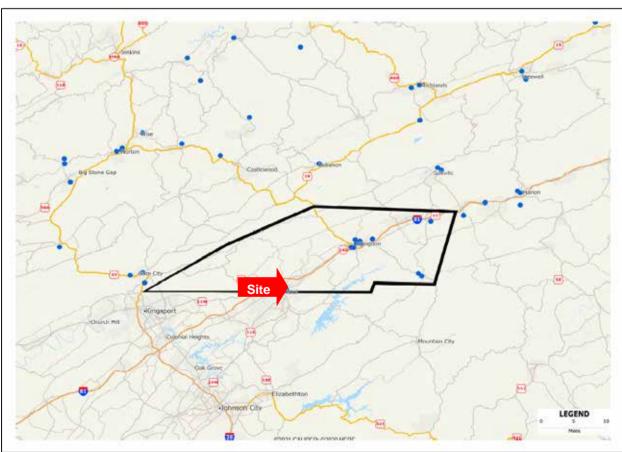

# **Market Area**

# **Drive Time**

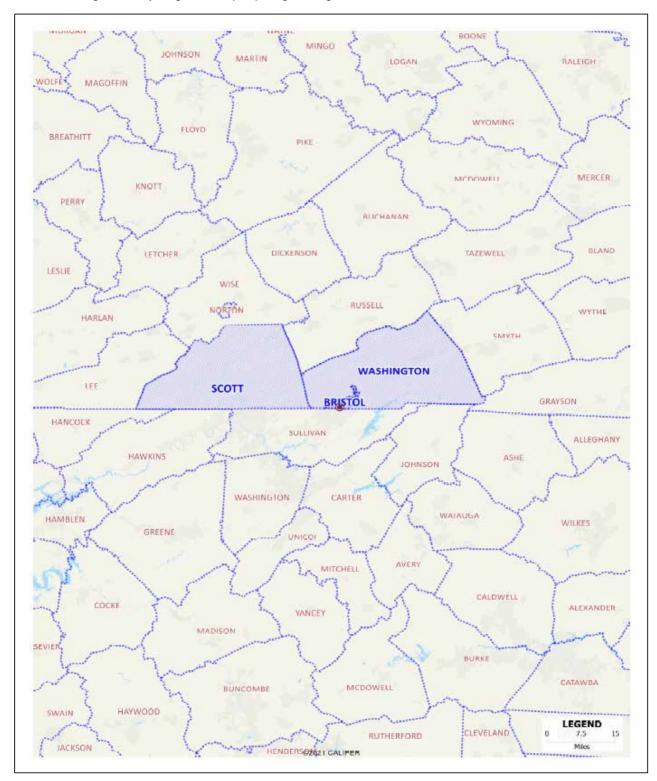

# **Existing Multifamily**

### **ECONOMIC OUTLOOK**

In this section we conduct an analysis of the regional economy. For purposes of our analysis, we define the region as Bristol City as well as Scott and Washington County, Virginia. A map depicting the Region is found below.

### **Employment by Industry**

The Bureau of Labor Statistics (BLS) tracks establishment employment by major industry. In the table below we present the current breakdown and percent distribution. The data set comes from the Bureau of Labor Statistics (BLS) via Woods & Pool Economics.

Establishment Employment

| Industry   | Region | Reg %  | US %   |
|--|--------|--------|--------|
| Farm Employment  | 2,621  | 5.4%   | 1.3%   |
| Forestry, Fishing, Related Activities And Other Employment | 240    | 0.5%   | 0.5%   |
| Mining Employment  | 324    | 0.7%   | 0.7%   |
| Utilities Employment                                       | 75     | 0.2%   | 0.3%   |
| Construction Employment                                    | 1,737  | 3.6%   | 5.4%   |
| Manufacturing Employment                                   | 5,420  | 11.2%  | 6.4%   |
| Wholesale Trade Employment                                 | 1,254  | 2.6%   | 3.5%   |
| Retail Trade Employment                                    | 6,323  | 13.0%  | 10.3%  |
| Transportation And Warehousing Employment                  | 1,741  | 3.6%   | 3.4%   |
| Information Employment                                     | 496    | 1.0%   | 1.6%   |
| Finance And Insurance Employment                           | 1,886  | 3.9%   | 5.4%   |
| Real Estate And Rental And Lease Employment                | 1,641  | 3.4%   | 4.8%   |
| Professional And Technical Services Employment             | 1,656  | 3.4%   | 6.9%   |
| Management Of Companies And Enterprises Employment         | 798    | 1.6%   | 1.3%   |
| Administrative And Waste Services Employment               | 2,326  | 4.8%   | 6.0%   |
| Educational Services Employment                            | 850    | 1.8%   | 2.5%   |
| Health Care And Social Assistance Employment               | 4,794  | 9.9%   | 12.1%  |
| Arts, Entertainment, And Recreation Employment             | 672    | 1.4%   | 2.2%   |
| Accommodation And Food Services Employment                 | 4,244  | 8.8%   | 7.5%   |
| Other Services, Except Public Administration Employment    | 2,806  | 5.8%   | 5.9%   |
| Federal Civilian Government Employment                     | 276    | 0.6%   | 1.4%   |
| Federal Military Employment                                | 286    | 0.6%   | 0.9%   |
| State And Local Government Employment                      | 6,007  | 12.4%  | 9.8%   |
| Establishment Employment                                   | 48,473 | 100.0% | 100.0% |

Source: W&P Economics

Regional establishment employment currently stands at 48,473. The data suggests that Retail Trade is the largest employment category accounting for 13.0% of total regional employment. State and Local Government is the second largest category accounting for 12.4% of total employment. Manufacturing is the third largest category accounting for 11.2% of total employment. Health Care and Social Assistance is the fourth largest category accounting for 9.9% of total employment. Accommodation and Food Services is the fifth largest category accounting for 8.8% of total employment.

Economists generally classify employment two ways: basic and non-basic. Basic employment, which is considered to be the engine of a local economy, includes industries that rely on external factors to fuel demand. For instance, mining, logging and manufacturers are frequently considered basic employers. Goods for these industries are shipped outside the location where they are produced. Non-basic employers depend largely on local demand and usually employ local workers. For example, grocery stores and restaurants are sometimes considered non-basic employers.

The Location Quotient (LQ) technique is the most common method of identifying basic industries for a given economy. The LQ technique compares the share of workers in each industry of a given economy with that of a larger reference economy. If the number of workers in the given economy is greater than that of the reference economy, these are considered to be basic industries because they fill needs beyond those of the reference community.

In the table above we highlight the basic industries for the region. The distribution of employment in these industries exceeds that for the United States. These basic industries represent about 27,394 employees or about 56.5% of total regional employment. These are the industries that drive the regional economy.

# **Earnings by Industry**

The Bureau of Labor Statistics (BLS) tracks average earnings by major industry. In the table below we present the current breakdown and rank. The data set comes from the Bureau of Labor Statistics (BLS) via Woods & Pool Economics.

| Average Earnings (2012 \$)                                 |           |        |  |  |
|--|-----------|--------|--|--|
| Industry   | Earnings  | Rank   |  |  |
| Farm Employment  | \$3,227   | 23     |  |  |
| Forestry, Fishing, Related Activities And Other Employment | \$28,471  | 16     |  |  |
| Mining Employment  | \$226,031 | 1      |  |  |
| Utilities Employment                                       | \$128,947 | 2      |  |  |
| Construction Employment                                    | \$26,064  | 19     |  |  |
| Manufacturing Employment                                   | \$58,119  | 5      |  |  |
| Wholesale Trade Employment                                 | \$40,498  | 11     |  |  |
| Retail Trade Employment                                    | \$26,496  | 18     |  |  |
| Transportation And Warehousing Employment                  | \$49,209  | 7      |  |  |
| Information Employment                                     | \$45,258  | 9      |  |  |
| Finance And Insurance Employment                           | \$34,022  | 14     |  |  |
| Real Estate And Rental And Lease Employment                | \$18,030  | 22     |  |  |
| Professional And Technical Services Employment             | \$42,291  | 10     |  |  |
| Management Of Companies And Enterprises Employment         | \$101,688 | 3      |  |  |
| Administrative And Waste Services Employment               | \$23,201  | 20     |  |  |
| Educational Services Employment                            | \$34,964  | 12     |  |  |
| Health Care And Social Assistance Employment               | \$47,603  | 8      |  |  |
| Arts, Entertainment, And Recreation Employment             | \$27,204  | 17     |  |  |
| Accommodation And Food Services Employment                 | \$21,515  | 21     |  |  |
| Other Services, Except Public Administration Employment    | \$33,427  | 15     |  |  |
| Federal Civilian Government Employment                     | \$91,812  | 4      |  |  |
| Federal Military Employment                                | \$34,766  | 13     |  |  |
| State And Local Government Employment                      | \$52,809  | 6      |  |  |
| Establishment Employment                                   | \$39,148  | $>\!<$ |  |  |

Source: W&P Economics

The data suggests that Mining is the highest paid industry averaging \$226,031 per employee. Utilities is the second highest paid industry averaging \$128,947 per employee. Management of Companies is the third highest paid profession averaging \$101,688 per employee. Federal Civilian Government is the fourth highest paid industry averaging \$91,812 per employee. Manufacturing is the fifth highest paid category averaging \$58,119 per employee. These figures are compared with regional Average Earnings of \$39,148 per employee.

The highlighted industries represent basic industries for the region. Average earnings for these basic industries comes to \$42,692 or 9.1% higher than average for the region.

## **Top Employers**

The table below gives a listing of the region's top employers. The data comes from InfoUSA and includes a primary industry description for each employer.

|                             |           | Top Employers |  |               |
|-----------------------------|-----------|---------------|--|---------------|
| Name                        | Employees | SIC Code      | Industry Description                     | Location Type |
| Food City Distribution Ctr  | 1,001     | 5099-98       | Distribution Centers (Whls)              | -             |
| Johnston Memorial Hospital  | 687       | 8062-02       | Hospitals                                | -             |
| Walmart Supercenter         | 550       | 5311-02       | Department Stores                        | Branch        |
| KSC Consulting LLC          | 499       | 8711-06       | Engineers                                | =             |
| Universal Fibers Inc        | 450       | 2655-01       | Fiber & Fiber Products (Mfrs)            | Branch        |
| Emory & Henry College       | 300       | 8221-01       | Schools-Universities & Colleges Academic | -             |
| Federal Pacific             | 300       | 5063-30       | Electric Equipment & Supplies-Wholesale  | 0             |
| Highlands Behavioral Health | 300       | 8063-01       | Mental Health Services                   | -             |
| Highlands Community Svc     | 300       | 8999-99       | Services NEC                             | -             |
| Highlands Community Svc CSB | 300       | 8999-99       | Services NEC                             | -             |

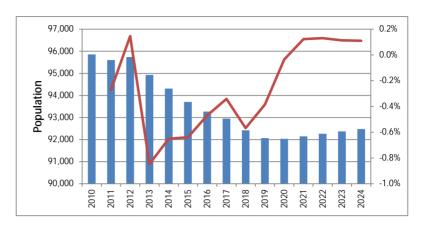

Source: InfoUSA

The top employers include: (1) Food City Distribution Ctr (1001 employees); (2) Johnston Memorial Hospital (687 employees) and; (3) Walmart Supercenter (550 employees).

## **Population**

In this section we present population data for the region. The table and graph below show historic data since 2010. The historic data comes from the US Census; the forecast comes from Woods & Pool Economics.

| Population Forecast |        |          |  |  |  |
|---------------------|--------|----------|--|--|--|
| Year                | Pop    | Growth % |  |  |  |
| 2010                | 95,861 |          |  |  |  |
| 2011                | 95,601 | -0.3%    |  |  |  |
| 2012                | 95,741 | 0.1%     |  |  |  |
| 2013                | 94,930 | -0.8%    |  |  |  |
| 2014                | 94,313 | -0.6%    |  |  |  |
| 2015                | 93,710 | -0.6%    |  |  |  |
| 2016                | 93,270 | -0.5%    |  |  |  |
| 2017                | 92,952 | -0.3%    |  |  |  |
| 2018                | 92,424 | -0.6%    |  |  |  |
| 2019                | 92,068 | -0.4%    |  |  |  |
| 2020                | 92,036 | 0.0%     |  |  |  |
| 2021                | 92,149 | 0.1%     |  |  |  |
| 2022                | 92,269 | 0.1%     |  |  |  |
| 2023                | 92,374 | 0.1%     |  |  |  |
| 2024                | 92,476 | 0.1%     |  |  |  |

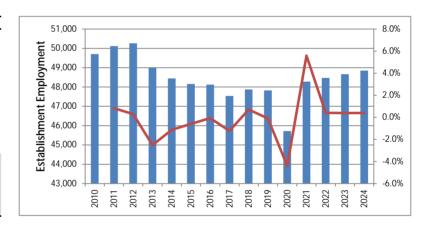

Source: US Census; W&P Economics

Population decreased from 95,861 in 2010 to 92,036 in 2020 and is anticipated to increase to 92,476 in 2024.

### **Establishment Employment**

In this section we present establishment employment data for the region. The table and graph below show historic data since 2010. The historic data comes from the Bureau of Labor Statistics (BLS); the forecast comes from Woods & Pool Economics.

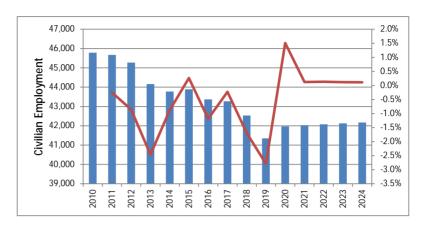

Source: BLS; W&P Economics

Establishment employment decreased from 49,706 in 2010 to 45,720 in 2020 and is anticipated to increase to 48,851 in 2024.

### **Civilian Employment**

In this section we present civilian employment data for the region. The table and graph below show historic data since 2010. The historic data comes from the Bureau of Labor Statistics (BLS); the forecast utilizes data from Woods & Pool Economics.

| Civilian Employment Forecast |         |          |  |  |
|------------------------------|---------|----------|--|--|
| Year                         | Civ Emp | Growth % |  |  |
| 2010                         | 45,782  |          |  |  |
| 2011                         | 45,668  | -0.2%    |  |  |
| 2012                         | 45,274  | -0.9%    |  |  |
| 2013                         | 44,160  | -2.5%    |  |  |
| 2014                         | 43,772  | -0.9%    |  |  |
| 2015                         | 43,887  | 0.3%     |  |  |
| 2016                         | 43,365  | -1.2%    |  |  |
| 2017                         | 43,265  | -0.2%    |  |  |
| 2018                         | 42,536  | -1.7%    |  |  |
| 2019                         | 41,350  | -2.8%    |  |  |
| 2020                         | 41,973  | 1.5%     |  |  |
| 2021                         | 42,025  | 0.1%     |  |  |
| 2022                         | 42,079  | 0.1%     |  |  |
| 2023                         | 42,127  | 0.1%     |  |  |
| 2024                         | 42,174  | 0.1%     |  |  |

Source: BLS; W&P Economics

Civilian employment decreased from 45,782 in 2010 to 41,973 in 2020 and is anticipated to increase to 42,174 in 2024.

### **Labor Force and Unemployment**

In this section we take a look at the labor force and unemployment. The table below shows civilian employment, unemployment and labor force statistics for the region since 2010. The data set comes from the Bureau of Labor Statistics (BLS) via the Texas A&M Real Estate Center.

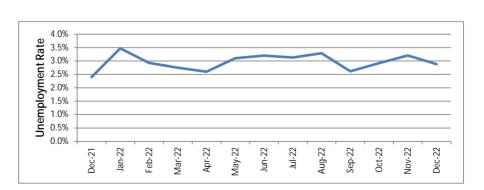

|      | Labor F | orce & Unemplo | •         |            |
|------|---------|----------------|-----------|------------|
| Year | Civ Emp | Unemp          | Lab Force | Unemp Rate |
| 2010 | 45,782  | 3,145          | 42,637    | 6.9%       |
| 2011 | 45,668  | 2,947          | 42,721    | 6.5%       |
| 2012 | 45,274  | 2,613          | 42,661    | 5.8%       |
| 2013 | 44,160  | 2,161          | 41,999    | 4.9%       |
| 2014 | 43,772  | 2,019          | 41,753    | 4.6%       |
| 2015 | 43,887  | 1,808          | 42,079    | 4.1%       |
| 2016 | 43,365  | 1,465          | 41,900    | 3.4%       |
| 2017 | 43,265  | 1,440          | 41,825    | 3.3%       |
| 2018 | 42,536  | 2,552          | 39,984    | 6.0%       |
| 2019 | 41,350  | 1,563          | 39,787    | 3.8%       |
| 2020 | 41,973  | 1,263          | 40,710    | 3.0%       |

Source: BLS; Texas A&M Real Estate Center

Unemployment decreased from 3,145 in 2010 to 1,263 in 2020. The unemployment rate decreased from 6.9% in 2010 to 3.0% in 2020.

The table and graph below show the unemployment rate for the region for the past 12 months.

| Unemployment Rate |            |  |  |  |
|-------------------|------------|--|--|--|
| Month             | Unemp Rate |  |  |  |
| Dec-21            | 2.4%       |  |  |  |
| Jan-22            | 3.5%       |  |  |  |
| Feb-22            | 2.9%       |  |  |  |
| Mar-22            | 2.7%       |  |  |  |

| Sep-22            | 2.6%       |  |  |  |
| Oct-22            | 2.9%       |  |  |  |
| Nov-22            | 3.2%       |  |  |  |
| Dec-22            | 2.9%       |  |  |  |
| Source            | e: TAMU    |  |  |  |

The Unemployment Rate for the Region came in at 2.4% in December 2021 and 2.9% in December 2022.

# **Building Permits**

In this section we look at building permits. The table and graph below show historical data for the region since 2000. The data set comes from the US Census.

|      |          | Building Permits |           |       |
|------|----------|------------------|-----------|-------|
| Year | 1 Family | 2-4 Family       | 5+ Family | Total |
| 2000 | 383      | 10               | 5         | 398   |
| 2001 | 333      | 21               | 5         | 359   |
| 2002 | 396      | 6                | 74        | 476   |
| 2003 | 365      | 32               | 97        | 494   |
| 2004 | 570      | 24               | 32        | 626   |
| 2005 | 349      | 26               | 115       | 490   |
| 2006 | 392      | 0                | 0         | 392   |
| 2007 | 355      | 20               | 30        | 405   |
| 2008 | 181      | 64               | 44        | 289   |
| 2009 | 141      | 21               | 10        | 172   |
| 2010 | 131      | 14               | 0         | 145   |
| 2011 | 152      | 4                | 20        | 176   |
| 2012 | 113      | 20               | 0         | 133   |
| 2013 | 115      | 2                | 0         | 117   |
| 2014 | 76       | 4                | 0         | 80    |
| 2015 | 92       | 8                | 0         | 100   |
| 2016 | 89       | 56               | 0         | 145   |
| 2017 | 99       | 6                | 0         | 105   |
| 2018 | 87       | 10               | 0         | 97    |
| 2019 | 71       | 10               | 0         | 81    |
| 2020 | 101      | 2                | 0         | 103   |

Source: US Census

Building permits for the region increased from 359 in 2001 to 626 in 2004, before decreasing to 80 in 2014 and increasing to 103 in 2020.

### Conclusion

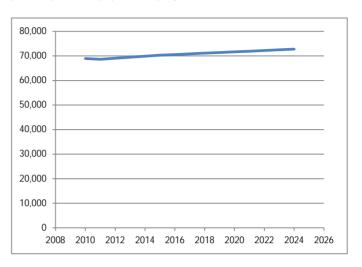

We anticipate moderate economic growth accompanied by modest population growth for the region over the next several years.

#### **DEMOGRAPHIC CHARACTERISTICS**

### **Population**

In the table below we give the 2010-2024 Caliper Corporation population projection for the Market Area.

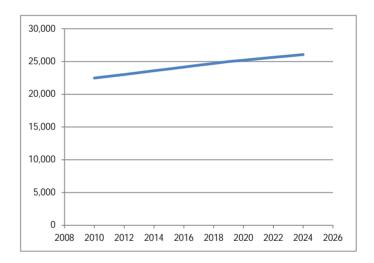

| Population Forecast |                 |            |  |  |
|---------------------|-----------------|------------|--|--|
| Year                | Population      | Growth %   |  |  |
| 2010                | 68,932          | -          |  |  |
| 2011                | 68,626          | -0.4%      |  |  |
| 2012                | 69,042          | 0.6%       |  |  |

## **Overburdened Renter Households**

The following tables give overburdened renter household data for the Market Area. The data set comes from the U.S. Census Bureau.

Overburdened Renter Households

|                                   | % of Total |
|-----------------------------------|------------|
| <20% of Income Spent on Housing   | 41.5%      |
| 20-24% of Income Spent on Housing | 14.5%      |
| 25-29% of Income Spent on Housing | 10.6%      |
| 30-34% of Income Spent on Housing | 7.4%       |
| >35% of Income Spent on Housing   | 26.0%      |
| Total                             | 100.0%     |

Source: U.S. Census Bureau

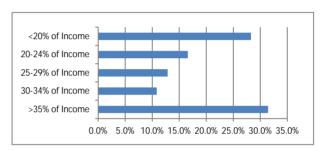

Our research suggests that 26.0 percent of the renter households in this market area are overburdened, paying more than 35 percent of their income towards housing-related costs. Our research also suggests that 33.4 percent of the renter households are overburdened to 30 percent of income.

55+ Overburdened Renter Households

|                                   | % of Total |
|-----------------------------------|------------|
| <20% of Income Spent on Housing   | 28.3%      |
| 20-24% of Income Spent on Housing | 16.6%      |
| 25-29% of Income Spent on Housing | 12.9%      |
| 30-34% of Income Spent on Housing | 10.8%      |
| >35% of Income Spent on Housing   | 31.5%      |
| Total                             | 100.0%     |

Source: U.S. Census Bureau

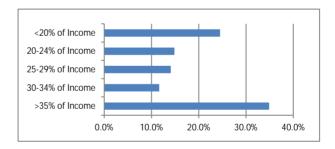

Our research suggests that 31.5 percent of the 55+ renter households in this market area are overburdened, paying more than 35 percent of their income towards housing-related costs. Our research also suggests that 42.3 percent of the 55+ renter households are overburdened to 30 percent of income.

65+ Overburdened Renter Households

|                                   | % of Total |
|-----------------------------------|------------|
| <20% of Income Spent on Housing   | 24.5%      |
| 20-24% of Income Spent on Housing | 14.9%      |
| 25-29% of Income Spent on Housing | 14.1%      |
| 30-34% of Income Spent on Housing | 11.6%      |
| >35% of Income Spent on Housing   | 34.9%      |
| Total                             | 100.0%     |

Source: U.S. Census Bureau

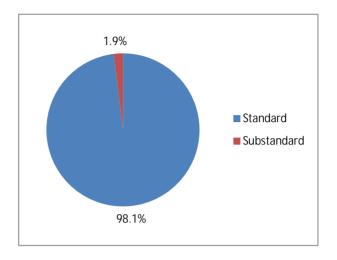

Our research suggests that 34.9 percent of the 65+ renter households in this market area are overburdened, paying more than 35 percent of their income towards housing-related costs. Our research also suggests that 46.5 percent of the 65+ renter households are overburdened to 30 percent of income.

### **Owner Substandard Units**

The U.S. Census Bureau defines substandard housing units as follows: (1) Units without complete plumbing; or (2) Units with 1.00 or more persons per room.

The following tables give owner substandard housing unit data for occupied housing units in the nation, state, region and market area. The data comes from the U.S. Census Bureau:

| Owner Substandard Units       |            |
|-------------------------------|------------|
|                               | % of Total |
| 1.00 persons per room or less | 98.1%      |
| 1.01 to 1.50 persons per room | 0.5%       |
| 1.51 persons per room or more | 0.1%       |
| Complete Plumbing             | 98.7%      |
|                               |            |
| 1.00 persons per room or less | 1.3%       |
| 1.01 to 1.50 persons per room | 0.0%       |
| 1.51 persons per room or more | 0.0%       |
| Lacking Complete Plumbing     | 1.3%       |
|                               |            |
| Standard                      | 98.1%      |
| Substandard                   | 1.9%       |
| Total                         | 100.0%     |
|                               |            |

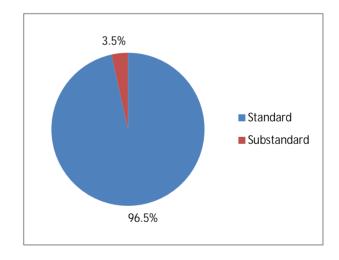

Source: U.S. Census Bureau

Our research suggests that 1.9 percent of occupied owner housing units in the market area are substandard.

## **Renter Substandard Units**

The following tables give renter substandard housing unit data for occupied housing units in the nation, state, region and market area. The data comes from the U.S. Census Bureau:

| Renter Substandard Units      |            |
|-------------------------------|------------|
|                               | % of Total |
| 1.00 persons per room or less | 96.5%      |
| 1.01 to 1.50 persons per room | 1.2%       |
| 1.51 persons per room or more | 0.5%       |
| Complete Plumbing             | 98.2%      |
|                               |            |
| 1.00 persons per room or less | 1.7%       |
| 1.01 to 1.50 persons per room | 0.1%       |
| 1.51 persons per room or more | 0.0%       |
| Lacking Complete Plumbing     | 1.8%       |
|                               |            |
| Standard                      | 96.5%      |
| Substandard                   | 3.5%       |
| Total                         | 100.0%     |
| Source: U.S. Census Bureau    |            |

Our research suggests that 3.5 percent of renter owner housing units in the market area are substandard.

# **Owner Movership**

The following tables give owner household movership data for the market area with an estimated breakout by household size. The data comes from the U.S. Census Bureau and the American Housing Survey:

Owner Movership, by Size

| Market Area          |          |          |          |          |          |          |           |       |  |
|----------------------|----------|----------|----------|----------|----------|----------|-----------|-------|--|
|                      | 1 Person | 2 Person | 3 Person | 4 Person | 5 Person | 6 Person | 7+ Person | Total |  |
| Owner to Owner       | 2.1%     | 3.2%     | 4.2%     | 4.1%     | 4.5%     | 4.8%     | 5.6%      | 3.4%  |  |
| Owner to Renter      | 2.0%     | 1.8%     | 3.3%     | 3.1%     | 3.0%     | 4.6%     | 7.0%      | 2.5%  |  |
| Owner Movership Rate | 4.0%     | 5.0%     | 7.5%     | 7.2%     | 7.5%     | 9.4%     | 12.7%     | 5.9%  |  |

Source: U.S. Census, American Housing Survey; Allen & Associates

Our research suggests an owner movership rate of 5.9 percent.

Elderly Owner Movership, by Size

| AHS Survey           |          |          |          |          |          |          |           |       |

Source: U.S. Census, American Housing Survey; Allen & Associates

Our research suggests an elderly renter movership rate of 8.0 percent.

### **SUPPLY ANALYSIS**

In conducting our analysis, we began by attempting to compile a list of every multifamily property with 10 or more units in the market area. We included conventionally-financed multifamily communities as well as properties financed by the local housing authority and the state housing finance agency in our listing. We even included properties financed by and/or subsidized by USDA and/or HUD. Finally, we included properties that are either proposed or currently under construction. The result was a listing of projects with 10 or more units - whether existing, under construction, or proposed - for this area. Our rental property inventory listing is found in the pages that follow.

A map showing the location of the properties included in the rental property inventory is found in the pages that follow. Properties identified with red pushpins have 100 percent market rate units (market rate properties), properties identified with yellow pushpins have a mixture of market rate / restricted / subsidized units (restricted properties), and properties identified with blue pushpins have 100 percent project-based rental assistance (subsidized properties).

After accounting for any unconfirmed properties and any properties that are located outside the defined market area, we arrived at a list of confirmed market area properties. This was the listing of properties upon which our analysis is based. In our opinion, the properties included on this list give a credible picture of market conditions as of the effective date of this report. This listing is found in the pages that follow.

Our next step was to compile a master list of unrestricted market rate rent comparables from the listing of confirmed properties. We eliminated any properties which were either under construction, being renovated, in lease up, or which were unstabilized for one reason or another. We identified market rate properties of similar age and condition to the subject property. If we were unable to identify a sufficient number of market rate comparables in the market area, we included market rate properties from outside the market area. If we were still unable to identify a sufficient number of market rate comparables, we included rent restricted properties - provided, however, that the rents charged at these properties were below statuatory limits and similar to the rents charged at the market rate properties in the market area (suggesting that these rent restricted properties were *de facto* market rate properties).

Finally, we compiled a master list of restricted rent comparables from the listing of confirmed properties. We used the same approach described above for unrestricted market rate properties.

The resulting master lists of rent comparables and accompanying locator maps are found in this section as well. Detailed write-ups for the properties included on these lists are found in the Appendix. We include write-ups for *all* of the rent comparables identified on our master lists, regardless of whether they ended up being selected as one of the *best* rent comparables. We did this for two reasons: (1) To be transparent; and (2) To provide the reader with context regarding our selection process.

The balance of this section includes a breakdown of confirmed market area properties by rent type, project status, year built, and financing source. We also include a rent, unit mix, and amenity summary for confirmed market area properties. Finally, we provide summary of vouchers, concessions, and waiting lists for the properties included in this report.

Occupancies of stabilized market area properties broken out by occupancy type (elderly or family) and rent type (subsidized, restricted or market rate) are found below:

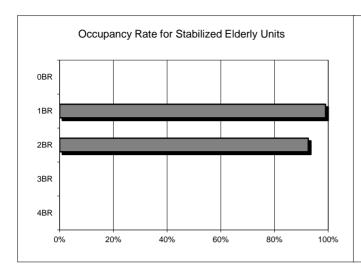

Our research suggests the following occupancy levels for the 230 stabilized elderly units in this market area:

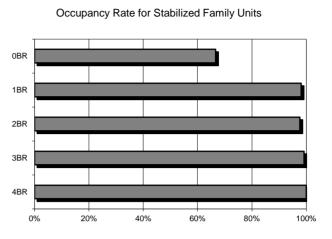

- Subsidized, 99 percent (143 units in survey)
- Restricted, 100 percent (71 units in survey)
- Market Rate, 88 percent (16 units in survey)

Our research suggests the following occupancy levels for the 1,523 stabilized family units in this market area:

- Subsidized, 100 percent (400 units in survey)
- Restricted, 98 percent (324 units in survey)
- Market Rate, 96 percent (799 units in survey)

Occupancy rates for stabilized market area properties broken out by occupancy type (elderly or family) and unit type are found below (supporting data is found in the pages that follow):

Our research suggests the following occupancy levels for the 230 stabilized elderly units in this market area:

- 0-Bedroom, not applicable (0 units in survey)
- 1-Bedroom, 99 percent (203 units in survey)
- 2-Bedroom, 93 percent (27 units in survey)
- 3-Bedroom, not applicable (0 units in survey)
- 4-Bedroom, not applicable (0 units in survey)

Our research suggests the following occupancy levels for the 1,523 stabilized family units in this market area:

- 0-Bedroom, 67 percent (21 units in survey)
- 1-Bedroom, 98 percent (323 units in survey)
- 2-Bedroom, 98 percent (904 units in survey)
- 3-Bedroom, 99 percent (253 units in survey)
- 4-Bedroom, 100 percent (22 units in survey)

Our research suggests that 10 percent of confirmed market area properties are 1 story in height, 90 percent are 2-4 stories in height, 0 percent are 5-10 stories in height, and 0 percent are over 10 stories in height. In addition, surveyed properties benefit from the following project amenities: 6 percent have a business/computer center, 38 percent have a community center, 13 percent have a fitness center, 19 percent have a playground, and 6 percent have a sports court.

Our research also suggests that the following unit amenities are present at surveyed properties: 96 percent have blinds, 96 percent have carpeting, 73 percent have patios/balconies, and 17 percent have outside storage. Surveyed properties also include the following kitchen amenities: 100 percent have a stove, 100 percent have a refrigerator, 42 percent have a disposal, 69 percent have a dishwasher, and 6 percent have a microwave.

In addition, 90 percent of confirmed market area properties have central heat while 85 percent have central air. Our research also suggests that 100 percent of surveyed properties have open parking. A total of 52 percent of area properties have central laundry facilities, while 35 percent have washer/dryer hookups, and 19 percent have washer/dryer units in each residential unit.

A total of 15 percent of confirmed market area properties have call buttons, 6 percent have controlled access, and 4 percent have security alarms.

It is also our understanding that the majority of confirmed market area properties provide cable access.

Finally, in the following pages we provide a summary of vouchers, concessions and waiting lists for the confirmed market area properties included in this report. We also include any absorption information we have uncovered as part of our research.

## **RENT COMPARABILITY ANALYSIS**

In this section we develop restricted and unrestricted market rent conclusions for the subject property on an "as if complete & stabilized" basis. Our analysis begins with an evaluation of unrestricted market rents.

# **Unrestricted Rent Analysis**

In this section we develop an unrestricted market rent conclusion for the subject property units. Our analysis began by selecting comparable rentals to use to develop estimates of market rents for the units at the subject property, assuming that the subject was an unrestricted property. Our selection of comparables was based on location, age, condition, unit mix and amenities of the comparable properties relative to the subject property.

# Rental Property Inventory, by Unit Type

In the following pages we present an inventory of properties included in this analysis. Rents for these properties, broken out by unit type, were used in selecting the rent comparables used in this analysis.

The properties that we consider to be comparable to the subject property are highlighted in the tables found in the following pages. We attempted to select stabilized market rate properties as comparables for purposes of our rent comparability analysis.

Comparables with restricted rents are used when a sufficient number of market rent comparables are not available and when maximum allowable rents for properties with restricted rents exceed prevailing rents in the area. In the event that program rental rates exceed market rental rates, restricted units are, in fact, *de facto* market rate units.

## Rent Comparables, Market Rate, Map

A map showing the location of the properties selected as comparables in this analysis is found in the following pages. Properties identified with red pushpins have market rents, properties identified with yellow pushpins have restricted rents, and properties identified with blue pushpins have subsidized rents. Detailed write-ups for the select rent comparables are found in the Appendix to this report.

### Rent Comparability Grids

Our analysis employed the use of rent comparability grids and resulted in an unrestricted market rent estimate for each of the subject's unit types. These grids and a narrative describing our rent adjustments are found in the following pages.

Rental Property Inventory, 2-Bedroom Units

#### Rent Adjustments

Our analysis included a property management survey and a technique known as "statistical extraction" to help us identify the best adjustments to use. Statistical extraction, which is similar to the matched pair method, helped us derive the optimal adjustments for our particular data set.

Here's a hypothetical example to illustrate how we derived our rent adjustments. Assume that property managers tell us we should expect rent adjustments ranging from \$0.00 to \$0.50 per square foot for a particular market. Next, assume that we select 25 rent comparables with an adjusted sample standard deviation (a statistical measure of variability) of \$100. We employ a square foot rent adjustment of \$0.10 for each comparable resulting in an adjusted sample standard deviation of \$90. This tells us that the assumed adjustment "explained" some of the variability in the data. We repeat this process for adjustments of \$0.20, \$0.30, \$0.40 and \$0.50 which yielded adjusted sample standard deviations of \$80, \$70, \$65 and \$75, respectively. The \$0.40 square foot adjustment "explains" the most variability because any other adjustment yields a higher adjusted sample standard deviation. Consequently, a \$0.40 rent adjustment is the best adjustment for purposes of this example. This is a simplified example because we actually adjusted for numerous variables simultaneously in our analysis.

Many adjustments (bedroom count, bathroom count and square footage) are highly interrelated. Statistical extraction helped us unravel the interrelationships between these variables. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is superior a "plus" adjustment is made. If the subject is inferior a "minus" adjustment is made.

We used the Excel Solver function to help us with our analysis. The Solver function was programmed to minimize the adjusted standard deviation for our data set. We evaluated a total of 62 variables in 22 categories (AC systems, heating systems, technology, bedrooms, bathrooms, square feet, visibility, access, neighborhood, area amenities, condition, effective age, project amenities, elevator, unit amenities, storage, kitchen amenities, parking, laundry, security, on-site management, on-site maintenance) in an effort to identify the mix of adjustments that explained the most variability found in our raw data.

A discussion of our surveyed and concluded adjustments is found below.

#### Concessions

The first step in our analysis was to account for any concessions at the subject and the comparables. We considered the advertised street rent and concessions being offered and derived a net nent estimate for each comparable. Net rent, defined as advertised street rent minus monthly concessions, represents the cash rent paid by new residents at the various properties. This is the best measure of market value (prior to any other adjustments) for the comparables included in this analysis.

#### Tenant-Paid Utilities

The next step in our analysis was to account for differences in tenant-paid utilities between the comparable properties and the subject. We used the HUD Utility Schedule Model to derive our adjustments. The HUD model includes a current utility rate survey for the area. In the event that the tenant-paid utilities associated with a particular property are higher or lower than the subject, adjustments were made to account for the differences. Adjustments reflect the difference between the tenant-paid utilities for the comparable property minus that for the subject.

# Technology

We accounted for technology (cable and internet access) offered in the rent for each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0 per month for cable; internet access was valued at \$0.

| Technology |                           |     |     |  |  |  |  |  |  |  |
|------------|---------------------------|-----|-----|--|--|--|--|--|--|--|
| Adjustment | nt Survey Range Concluded |     |     |  |  |  |  |  |  |  |
| Cable      | \$0                       | \$0 | \$0 |  |  |  |  |  |  |  |
| Internet   | \$0                       | \$0 | \$0 |  |  |  |  |  |  |  |

## **Bedrooms**

Our analysis also included an adjustment for the number of bedrooms at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$95 per bedroom.

| Bedrooms                          |      |       |      |
|-----------------------------------|------|-------|------|
| Adjustment Survey Range Concluded |      |       |      |
| Bedrooms                          | \$50 | \$200 | \$95 |

#### **Bathrooms**

Our analysis also included an adjustment for the number of bathrooms at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$50 per bathroom.

| Bathrooms  |                            |       |      |  |
|------------|----------------------------|-------|------|--|
| Adjustment | ent Survey Range Concluded |       |      |  |
| Bathrooms  | \$25                       | \$100 | \$50 |  |

### Square Feet

Our analysis also included an adjustment for square footage at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.50 per square foot.

| Square Feet                       |        |        |        |
|-----------------------------------|--------|--------|--------|
| Adjustment Survey Range Concluded |        |        |        |
| Square Feet                       | \$0.10 | \$2.00 | \$0.50 |

#### Visibility

We also accounted for differences in visibility at each of the comparables as compared to the subject property in our analysis. Based on our field review, we assigned a visibility rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in visibility ratings between the subject and the comparables.

|            | Vis    | ibility |           |
|------------|--------|---------|-----------|
| Adjustment | Survey | / Range | Concluded |
| Rating     | \$0    | \$100   | \$0       |

## Access

Our analysis also included an adjustment for access at each of the comparables as compared to the subject property. Based on our field review, we assigned an access rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in access ratings between the subject and the comparables.

|            | Ac     | cess    |           |
|------------|--------|---------|-----------|
| Adjustment | Survey | / Range | Concluded |
| Rating     | \$0    | \$100   | \$0       |

### Neighborhood

We considered differences in neighborhood at each of the comparables as compared to the subject property in our analysis. Based on our field review and our evaluation of local demographic and crime data (presented earlier in this report), we assigned a neighborhood rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$15 per point for differences in neighborhood ratings between the subject and the comparables.

| Neighborhood |        |         |           |  |
|--------------|--------|---------|-----------|--|
| Adjustment   | Survey | / Range | Concluded |  |
| Rating       | \$0    | \$100   | \$15      |  |

#### Area Amenities

We also accounted for area amenities for each of the comparables as compared to the subject property in our analysis. Based on our field review and our evaluation of local amenity data (presented earlier in this report), we assigned a local amenity rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in amenity ratings between the subject and the comparables.

| Area Amenities                    |     |       |     |
|-----------------------------------|-----|-------|-----|
| Adjustment Survey Range Concluded |     |       |     |
| Rating                            | \$0 | \$100 | \$0 |

#### Median Household Income

Our analysis also included an adjustment for median household income for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.0000 per dollar of median household income.

| Median Household Income           |                   |          |  |
|-----------------------------------|-------------------|----------|--|
| Adjustment Survey Range Concluded |                   |          |  |
| Med HH Inc                        | \$0.0000 \$0.0000 | \$0.0000 |  |

### Average Commute

Our analysis also included an adjustment for average commute for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.00 per each minute of commute.

| Average Commute                   |        |        |        |
|-----------------------------------|--------|--------|--------|
| Adjustment Survey Range Concluded |        |        |        |
| Avg Commute                       | \$0.00 | \$0.00 | \$0.00 |

## Public Transportation

Our analysis also included an adjustment for the existence of public transportation within walking distance of each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.00 for public transportation.

| Public Transportation             |               |  |        |
|-----------------------------------|---------------|--|--------|
| Adjustment Survey Range Concluded |               |  |        |
| Public Trans                      | \$0.00 \$0.00 |  | \$0.00 |

#### Personal Crime

Our analysis also included an adjustment for personal crime rates for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0 per 0.01 percentage points.

| Personal Crime                    |     |     |     |
|-----------------------------------|-----|-----|-----|
| Adjustment Survey Range Concluded |     |     |     |
| Personal Crime                    | \$0 | \$0 | \$0 |

#### Condition

Our analysis also included an adjustment for the condition of each comparable as compared to the subject property. Based on our field review, we assigned a condition rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$50 per point for differences in condition ratings between the subject and the comparables.

| Condition  |                                   |      |      |  |
|------------|-----------------------------------|------|------|--|
| Adjustment | Adjustment Survey Range Concluded |      |      |  |
| Rating     | \$10                              | \$50 | \$50 |  |

#### Effective Age

We considered differences in effective age in our analysis. Based on our field review, we estimated the effective age for each of the properties included in this analysis. Our estimates reflected the condition-adjusted age and remaining useful life of each property. Statistical extraction resulted in an adjustment of \$1.00 per year for differences in effective age between the subject and the comparables.

| Effective Age |        |        |           |  |  |  |  |
|---------------|--------|--------|-----------|--|--|--|--|
| Adjustment    | Survey | Range  | Concluded |  |  |  |  |
| Rating        | \$1.00 | \$5.00 | \$1.00    |  |  |  |  |

## **Project Amenities**

We considered the presence of various project amenities at the comparables as compared to the subject property. Project amenities include ball fields, BBQ areas, billiards, business/computer centers, car care centers, community centers, elevators, fitness centers, gazebos, hot tubs/Jacuzzis, horseshoe pits, lakes, libraries, movie theatres, picnic areas, playgrounds, pools, saunas, sports courts and walking trails. The survey range and our concluded adjustment for each amenity is summarized below.

| Project Amenities |        |       |           |  |  |  |  |
|-------------------|--------|-------|-----------|--|--|--|--|
| Adjustment        | Survey | Range | Concluded |  |  |  |  |
| Ball Field        | \$2    | \$10  | \$2       |  |  |  |  |
| BBQ Area          | \$2    | \$10  | \$10      |  |  |  |  |
| Billiards         | \$2    | \$10  | \$2       |  |  |  |  |
| Bus/Comp Ctrs     | \$2    | \$10  | \$2       |  |  |  |  |
| Car Care Center   | \$2    | \$10  | \$2       |  |  |  |  |
| Community Center  | \$2    | \$10  | \$10      |  |  |  |  |
| Elevator          | \$10   | \$100 | \$10      |  |  |  |  |
| Fitness Center    | \$2    | \$10  | \$10      |  |  |  |  |
| Gazebo            | \$2    | \$10  | \$2       |  |  |  |  |
| Hot Tub/Jacuzzi   | \$2    | \$10  | \$2       |  |  |  |  |
| Horseshoe Pit     | \$2    | \$10  | \$2       |  |  |  |  |
| Lake              | \$2    | \$10  | \$2       |  |  |  |  |
| Library           | \$2    | \$10  | \$2       |  |  |  |  |
| Movie Theatre     | \$2    | \$10  | \$2       |  |  |  |  |
| Picnic Area       | \$2    | \$10  | \$2       |  |  |  |  |
| Playground        | \$2    | \$10  | \$10      |  |  |  |  |
| Pool              | \$2    | \$10  | \$10      |  |  |  |  |
| Sauna             | \$2    | \$10  | \$2       |  |  |  |  |
| Sports Court      | \$2    | \$10  | \$10      |  |  |  |  |
| Walking Trail     | \$2    | \$10  | \$2       |  |  |  |  |

# **Unit Amenities**

We considered the presence of various unit amenities at the comparables as compared to the subject property. Unit amenities include blinds, ceiling fans, carpeting/upgraded flooring, fireplaces, patios/balconies and storage. The survey range and our concluded adjustment for each amenity is summarized below.

| Unit Amenities |        |       |           |  |  |  |  |  |
|----------------|--------|-------|-----------|--|--|--|--|--|
| Adjustment     | Survey | Range | Concluded |  |  |  |  |  |
| Blinds         | \$2    | \$10  | \$2       |  |  |  |  |  |
| Ceiling Fans   | \$2    | \$10  | \$2       |  |  |  |  |  |
| Carpeting      | \$2    | \$10  | \$2       |  |  |  |  |  |
| Fireplace      | \$2    | \$10  | \$2       |  |  |  |  |  |
| Patio/Balcony  | \$2    | \$10  | \$2       |  |  |  |  |  |
| Storage        | \$10   | \$50  | \$10      |  |  |  |  |  |

#### Kitchen Amenities

We considered the presence of various kitchen amenities at the comparables as compared to the subject property. Kitchen amenities include stoves, refrigerators, disposals, dishwashers and microwaves. The survey range and our concluded adjustment for each amenity is summarized below.

#### Kitchen Amenities

| Tatterier / mileriage |        |       |           |  |  |  |
|-----------------------|--------|-------|-----------|--|--|--|
| Adjustment            | Survey | Range | Concluded |  |  |  |
| Stove                 | \$2    | \$10  | \$2       |  |  |  |
| Refrigerator          | \$2    | \$10  | \$2       |  |  |  |
| Disposal              | \$2    | \$10  | \$10      |  |  |  |
| Dishwasher            | \$2    | \$10  | \$2       |  |  |  |
| Microwave             | \$2    | \$10  | \$6       |  |  |  |

## Parking

We also adjusted for differing types of parking configurations. We classified parking five ways: (1) Garage, (2) Covered; (3) Assigned, (4) Open and (5) No parking offered. Statistical extraction resulted in an adjustment of \$50 per month for garages; covered parking was valued at \$20; assigned parking was valued at \$10; open parking was valued at \$0; no parking was valued at \$0.

# Laundry

We also evaluated differing types of laundry configurations. We classified laundry amenities three ways: (1) Central Laundry, (2) Washer/Dryer Units; and (3) Washer/Dryer Hookups. Our analysis resulted in an adjustment of \$25 per month for central laundries; washer/dryer units were valued at \$10; washer/dryer hookups were valued at \$25.

| W/D Hookups | \$5    | \$25  | \$25      |

### Security

We considered the presence of various security amenities at the comparables as compared to the subject property. Security amenities include call buttons, controlled access, courtesy officers, monitoring, security alarms and security patrols. The survey range and our concluded adjustment for each amenity is summarized below.

Securit

| Adjustment        | Survey | Range | Concluded |
|-------------------|--------|-------|-----------|
| Call Buttons      | \$2    | \$10  | \$2       |
| Controlled Access | \$2    | \$10  | \$2       |
| Courtesy Officer  | \$2    | \$10  | \$2       |
| Monitoring        | \$2    | \$10  | \$2       |
| Security Alarms   | \$2    | \$10  | \$2       |
| Security Patrols  | \$2    | \$10  | \$2       |

### Rent Conclusion, 3BR-2.5BA-1496sf

The development of our rent conclusion for the 3BR-2.5BA-1496sf units is found below.

Our analysis included the evaluation of a total of 21 unit types found at 6 properties. We selected the 21 most comparable units to utilize as rent comparables for purposes of this analysis. A write-up for each of the properties included in this analysis is found in the Appendix.

Our analysis included the adjustments developed in the previous section. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is better, a "plus" adjustment is made. If the subject is inferior, a "minus" adjustment is made. In the table below, we summarize the adjustments and the resulting indicated rent for the top 21 comparables included in this analysis. The units that we consider most comparable are highlighted for the reader's reference.

## **Unrestricted Market Rent Conclusion**

Based on our evaluation of the rents at the select comparable properties, and considering the location, quality and amenities of the subject property, we conclude the following market rents for the subject property units, assuming that the subject were an unrestricted property:

Unrestricted Market Rent Conclusion

| Unit Type / Income Limit / Rent Limit      | HOME | Subsidized | Units | Market  | Proposed | Advantage |
|--|------|------------|-------|---------|----------|-----------|
| 3BR-2BA-1344sf / 60% of AMI / 40% of AMI   | No   | Yes        | 2     | \$1,550 | \$850    | 45.2%     |
| 3BR-2.5BA-1344sf / 60% of AMI / 50% of AMI | No   | Yes        | 1     | \$1,550 | \$850    | 45.2%     |
| 3BR-2.5BA-1344sf / 60% of AMI / 50% of AMI | No   | Yes        | 4     | \$1,550 | \$850    | 45.2%     |
| 3BR-2.5BA-1488sf / 60% of AMI / 50% of AMI | No   | Yes        | 2     | \$1,550 | \$850    | 45.2%     |
| 3BR-2BA-1489sf / 60% of AMI / 40% of AMI   | No   | Yes        | 1     | \$1,550 | \$850    | 45.2%     |
| 3BR-2BA-1489sf / 60% of AMI / 50% of AMI   | No   | Yes        | 1     | \$1,550 | \$850    | 45.2%     |
| 3BR-2BA-1496sf / 60% of AMI / 50% of AMI   | No   | Yes        | 1     | \$1,550 | \$850    | 45.2%     |
| 3BR-2.5BA-1496sf / 60% of AMI / 60% of AMI | No   | Yes        | 11    | \$1,550 | \$850    | 45.2%     |
| Total / Average                            |      |            | 23    | \$1,550 | \$850    | 45.2%     |

Our analysis suggests an average unrestricted market rent of \$1,550 for the subject property. This is compared with an average proposed rent of \$850, yielding an unrestricted market rent advantage of 45.2 percent. Overall, the subject property appears to be priced at or below unrestricted market rents for the area.

We selected a total of 6 properties as comparables for purposes of our analysis. The average occupancy at the select rent comparables currently stands at 99 percent.

Occupancy rates for the selected rent comparables are broken out below:

Occupancy Rate, Select Comparables

|           | Subsidized | 20% of AMI | 30% of AMI | 40% of AMI | 50% of AMI | 60% of AMI | 80% of AMI | Market |
|-----------|------------|------------|------------|------------|------------|------------|------------|--------|
| 0-Bedroom |            |            |            |            |            |            |            |        |
| 1-Bedroom |            |            |            |            |            |            |            |        |
| 2-Bedroom |            |            |            |            |            |            |            | 99%    |
| 3-Bedroom |            |            |            |            |            |            |            | 97%    |
| 4-Bedroom |            |            |            |            |            |            |            |        |
| Total     |            |            |            |            |            |            |            | 99%    |

Occupancy rates for all stabilized market area properties are broken out below:

Occupancy Rate, Stabilized Properties

|           | Subsidized | 20% of AMI | 30% of AMI | 40% of AMI | 50% of AMI | 60% of AMI | 80% of AMI | Market |
|-----------|------------|------------|------------|------------|------------|------------|------------|--------|
| 0-Bedroom |            |            |            |            |            |            |            | 67%    |
| 1-Bedroom | 99%        |            |            | 100%       | 100%       |            | 100%       | 97%    |

# **Restricted Rent Analysis**

In this section we develop a restricted market rent conclusion and an achievable rent conclusion for the subject property units. Our analysis began by selecting comparable rentals to use to develop estimates of market rents for the units at the subject property, assuming that the subject was a restricted property. Our selection of comparables was based on location, age, condition, unit mix and amenities of the comparable properties relative to the subject property.

## Rental Property Inventory, by Unit Type

In the following pages we present an inventory of properties included in this analysis. Rents for these properties, broken out by unit type, were used in selecting the rent comparables used in this analysis.

The properties that we consider to be comparable to the subject property are highlighted in the tables found in the following pages. We attempted to select stabilized restricted rent properties as comparables for purposes of our rent comparability analysis.

Comparables with market rents are used when a sufficient number of restricted rent comparables are not available and when maximum allowable rents for properties with restricted rents exceed prevailing rents in the area. In the event that program rental rates exceed market rental rates, restricted units are, in fact, *de facto* market rate units.

# Rent Comparables, Restricted Rent, Map

A map showing the location of the properties selected as comparables in this analysis is found in the following pages. Properties identified with red pushpins have market rents, properties identified with yellow pushpins have restricted rents, and properties identified with blue pushpins have subsidized rents. Detailed write-ups for the select rent comparables are found in the Appendix to this report.

#### Rent Comparability Grids

Our analysis employed the use of rent comparability grids and resulted in a restricted market rent estimate for each of the subject's unit types. These grids and a narrative describing our rent adjustments are found in the following pages.

Rental Property Inventory, 2-Bedroom Units

#### Rent Adjustments

Our analysis included a property management survey and a technique known as "statistical extraction" to help us identify the best adjustments to use. Statistical extraction, which is similar to the matched pair method, helped us derive the optimal adjustments for our particular data set.

Here's a hypothetical example to illustrate how we derived our rent adjustments. Assume that property managers tell us we should expect rent adjustments ranging from \$0.00 to \$0.50 per square foot for a particular market. Next, assume that we select 25 rent comparables with an adjusted sample standard deviation (a statistical measure of variability) of \$100. We employ a square foot rent adjustment of \$0.10 for each comparable resulting in an adjusted sample standard deviation of \$90. This tells us that the assumed adjustment "explained" some of the variability in the data. We repeat this process for adjustments of \$0.20, \$0.30, \$0.40 and \$0.50 which yielded adjusted sample standard deviations of \$80, \$70, \$65 and \$75, respectively. The \$0.40 square foot adjustment "explains" the most variability because any other adjustment yields a higher adjusted sample standard deviation. Consequently, a \$0.40 rent adjustment is the best adjustment for purposes of this example. This is a simplified example because we actually adjusted for numerous variables simultaneously in our analysis.

Many adjustments (bedroom count, bathroom count and square footage) are highly interrelated. Statistical extraction helped us unravel the interrelationships between these variables. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is superior a "plus" adjustment is made. If the subject is inferior a "minus" adjustment is made.

We used the Excel Solver function to help us with our analysis. The Solver function was programmed to minimize the adjusted standard deviation for our data set. We evaluated a total of 62 variables in 22 categories (AC systems, heating systems, technology, bedrooms, bathrooms, square feet, visibility, access, neighborhood, area amenities, condition, effective age, project amenities, elevator, unit amenities, storage, kitchen amenities, parking, laundry, security, on-site management, on-site maintenance) in an effort to identify the mix of adjustments that explained the most variability found in our raw data.

A discussion of our surveyed and concluded adjustments is found below.

#### Concessions

The first step in our analysis was to account for any concessions at the subject and the comparables. We considered the advertised street rent and concessions being offered and derived a net nent estimate for each comparable. Net rent, defined as advertised street rent minus monthly concessions, represents the cash rent paid by new residents at the various properties. This is the best measure of market value (prior to any other adjustments) for the comparables included in this analysis.

#### Tenant-Paid Utilities

The next step in our analysis was to account for differences in tenant-paid utilities between the comparable properties and the subject. We used the HUD Utility Schedule Model to derive our adjustments. The HUD model includes a current utility rate survey for the area. In the event that the tenant-paid utilities associated with a particular property are higher or lower than the subject, adjustments were made to account for the differences. Adjustments reflect the difference between the tenant-paid utilities for the comparable property minus that for the subject.

# Technology

We accounted for technology (cable and internet access) offered in the rent for each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0 per month for cable; internet access was valued at \$0.

| Technology |        |       |           |  |  |  |  |  |
|------------|--------|-------|-----------|--|--|--|--|--|
| Adjustment | Survey | Range | Concluded |  |  |  |  |  |
| Cable      | \$0    | \$0   | \$0       |  |  |  |  |  |
| Internet   | \$0    | \$0   | \$0       |  |  |  |  |  |

## **Bedrooms**

Our analysis also included an adjustment for the number of bedrooms at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$50 per bedroom.

| Bedrooms   |        |       |           |  |  |  |  |
|------------|--------|-------|-----------|--|--|--|--|
| Adjustment | Survey | Range | Concluded |  |  |  |  |
| Bedrooms   | \$50   | \$200 | \$50      |  |  |  |  |

#### **Bathrooms**

Our analysis also included an adjustment for the number of bathrooms at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$25 per bathroom.

| Bathrooms  |        |       |           |  |  |  |  |
|------------|--------|-------|-----------|--|--|--|--|
| Adjustment | Survey | Range | Concluded |  |  |  |  |
| Bathrooms  | \$25   | \$100 | \$25      |  |  |  |  |

### Square Feet

Our analysis also included an adjustment for square footage at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.10 per square foot.

| Square Feet |        |        |           |  |  |  |  |
|-------------|--------|--------|-----------|--|--|--|--|
| Adjustment  | Survey | Range  | Concluded |  |  |  |  |
| Square Feet | \$0.10 | \$2.00 | \$0.10    |  |  |  |  |

#### Visibility

We also accounted for differences in visibility at each of the comparables as compared to the subject property in our analysis. Based on our field review, we assigned a visibility rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in visibility ratings between the subject and the comparables.

|            | Visibility |         |           |  |  |  |  |  |
|------------|------------|---------|-----------|--|--|--|--|--|
| Adjustment | Survey     | / Range | Concluded |  |  |  |  |  |
| Rating     | \$0        | \$100   | \$0       |  |  |  |  |  |

## Access

Our analysis also included an adjustment for access at each of the comparables as compared to the subject property. Based on our field review, we assigned an access rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in access ratings between the subject and the comparables.

|            | Access |         |           |  |  |  |  |  |
|------------|--------|---------|-----------|--|--|--|--|--|
| Adjustment | Survey | / Range | Concluded |  |  |  |  |  |
| Rating     | \$0    | \$100   | \$0       |  |  |  |  |  |

### Neighborhood

We considered differences in neighborhood at each of the comparables as compared to the subject property in our analysis. Based on our field review and our evaluation of local demographic and crime data (presented earlier in this report), we assigned a neighborhood rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in neighborhood ratings between the subject and the comparables.

| Neighborhood |                        |       |     |  |
|--------------|------------------------|-------|-----|--|
| Adjustment   | Survey Range Concluded |       |     |  |
| Rating       | \$0                    | \$100 | \$0 |  |

#### Area Amenities

We also accounted for area amenities for each of the comparables as compared to the subject property in our analysis. Based on our field review and our evaluation of local amenity data (presented earlier in this report), we assigned a local amenity rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in amenity ratings between the subject and the comparables.

| Area Amenities                    |     |       |     |  |
|-----------------------------------|-----|-------|-----|--|
| Adjustment Survey Range Concluded |     |       |     |  |
| Rating                            | \$0 | \$100 | \$0 |  |

#### Median Household Income

Our analysis also included an adjustment for median household income for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.0000 per dollar of median household income.

| Median Household Income           |                   |          |  |
|-----------------------------------|-------------------|----------|--|
| Adjustment Survey Range Concluded |                   |          |  |
| Med HH Inc                        | \$0.0000 \$0.0000 | \$0.0000 |  |

### Average Commute

Our analysis also included an adjustment for average commute for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.00 per each minute of commute.

| Average Commute |                        |        |        |  |
|-----------------|------------------------|--------|--------|--|
| Adjustment      | Survey Range Concluded |        |        |  |
| Avg Commute     | \$0.00                 | \$0.00 | \$0.00 |  |

## Public Transportation

Our analysis also included an adjustment for the existence of public transportation within walking distance of each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.00 for public transportation.

| Public Transportation             |                      |  |  |  |  |
|-----------------------------------|----------------------|--|--|--|--|
| Adjustment Survey Range Concluded |                      |  |  |  |  |
| Public Trans                      | \$0.00 \$0.00 \$0.00 |  |  |  |  |

#### Personal Crime

Our analysis also included an adjustment for personal crime rates for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0 per 0.01 percentage points.

| Personal Crime                    |     |     |     |  |
|-----------------------------------|-----|-----|-----|--|
| Adjustment Survey Range Concluded |     |     |     |  |
| Personal Crime                    | \$0 | \$0 | \$0 |  |

#### Condition

Our analysis also included an adjustment for the condition of each comparable as compared to the subject property. Based on our field review, we assigned a condition rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$10 per point for differences in condition ratings between the subject and the comparables.

| Condition                         |      |      |      |  |
|-----------------------------------|------|------|------|--|
| Adjustment Survey Range Concluded |      |      |      |  |
| Rating                            | \$10 | \$50 | \$10 |  |

#### Effective Age

We considered differences in effective age in our analysis. Based on our field review, we estimated the effective age for each of the properties included in this analysis. Our estimates reflected the condition-adjusted age and remaining useful life of each property. Statistical extraction resulted in an adjustment of \$1.20 per year for differences in effective age between the subject and the comparables.

| Effective Age                     |        |        |        |  |
|-----------------------------------|--------|--------|--------|--|
| Adjustment Survey Range Concluded |        |        |        |  |
| Rating                            | \$1.00 | \$5.00 | \$1.20 |  |

# Project Amenities

We considered the presence of various project amenities at the comparables as compared to the subject property. Project amenities include ball fields, BBQ areas, billiards, business/computer centers, car care centers, community centers, elevators, fitness centers, gazebos, hot tubs/Jacuzzis, horseshoe pits, lakes, libraries, movie theatres, picnic areas, playgrounds, pools, saunas, sports courts and walking trails. The survey range and our concluded adjustment for each amenity is summarized below.

| Project Amenities |        |       |           |  |
|-------------------|--------|-------|-----------|--|
| Adjustment        | Survey | Range | Concluded |  |
| Ball Field        | \$2    | \$10  | \$2       |  |
| BBQ Area          | \$2    | \$10  | \$2       |  |
| Billiards         | \$2    | \$10  | \$2       |  |
| Bus/Comp Ctrs     | \$2    | \$10  | \$2       |  |
| Car Care Center   | \$2    | \$10  | \$2       |  |
| Community Center  | \$2    | \$10  | \$2       |  |
| Elevator          | \$10   | \$100 | \$10      |  |
| Fitness Center    | \$2    | \$10  | \$2       |  |
| Gazebo            | \$2    | \$10  | \$2       |  |
| Hot Tub/Jacuzzi   | \$2    | \$10  | \$2       |  |
| Horseshoe Pit     | \$2    | \$10  | \$2       |  |
| Lake              | \$2    | \$10  | \$2       |  |
| Library           | \$2    | \$10  | \$2       |  |
| Movie Theatre     | \$2    | \$10  | \$2       |  |
| Picnic Area       | \$2    | \$10  | \$2       |  |
| Playground        | \$2    | \$10  | \$2       |  |
| Pool              | \$2    | \$10  | \$2       |  |
| Sauna             | \$2    | \$10  | \$2       |  |
| Sports Court      | \$2    | \$10  | \$2       |  |
| Walking Trail     | \$2    | \$10  | \$2       |  |

# **Unit Amenities**

We considered the presence of various unit amenities at the comparables as compared to the subject property. Unit amenities include blinds, ceiling fans, carpeting/upgraded flooring, fireplaces, patios/balconies and storage. The survey range and our concluded adjustment for each amenity is summarized below.

| Unit Amenities |        |       |           |  |  |
|----------------|--------|-------|-----------|--|--|
| Adjustment     | Survey | Range | Concluded |  |  |
| Blinds         | \$2    | \$10  | \$2       |  |  |
| Ceiling Fans   | \$2    | \$10  | \$2       |  |  |
| Carpeting      | \$2    | \$10  | \$2       |  |  |
| Fireplace      | \$2    | \$10  | \$2       |  |  |
| Patio/Balcony  | \$2    | \$10  | \$2       |  |  |
| Storage        | \$10   | \$50  | \$10      |  |  |

#### Kitchen Amenities

We considered the presence of various kitchen amenities at the comparables as compared to the subject property. Kitchen amenities include stoves, refrigerators, disposals, dishwashers and microwaves. The survey range and our concluded adjustment for each amenity is summarized below.

#### Kitchen Amenities

| Adjustment   | Survey Range |      | Concluded |  |  |
|--------------|--------------|------|-----------|--|--|
| Stove        | \$2          | \$10 | \$2       |  |  |
| Refrigerator | \$2          | \$10 | \$2       |  |  |
| Disposal     | \$2          | \$10 | \$2       |  |  |
| Dishwasher   | \$2          | \$10 | \$2       |  |  |
| Microwave    | \$2          | \$10 | \$2       |  |  |

## Parking

We also adjusted for differing types of parking configurations. We classified parking five ways: (1) Garage, (2) Covered; (3) Assigned, (4) Open and (5) No parking offered. Statistical extraction resulted in an adjustment of \$50 per month for garages; covered parking was valued at \$20; assigned parking was valued at \$10; open parking was valued at \$0; no parking was valued at \$0.

|  | n |
|--|---|
|  |   |

|            |              | 9     |           |
|------------|--------------|-------|-----------|
| Adjustment | Survey Range |       | Concluded |
| Garage     | \$50         | \$200 | \$50      |
| Covered    | \$20         | \$100 | \$20      |
| Assigned   | \$10         | \$50  | \$10      |
| Open       | \$0          | \$0   | \$0       |
| None       | \$0          | \$0   | \$0       |
|            |              |       |           |

# Laundry

We also evaluated differing types of laundry configurations. We classified laundry amenities three ways: (1) Central Laundry, (2) Washer/Dryer Units; and (3) Washer/Dryer Hookups. Our analysis resulted in an adjustment of \$5 per month for central laundries; washer/dryer units were valued at \$10; washer/dryer hookups were valued at \$5.

#### Laundr

| Adjustment  | \$10 \$50 |      | Concluded |
|-------------|-----------|------|-----------|
| Central     | \$5       | \$25 | \$5       |
| W/D Units   | \$10      | \$50 | \$10      |
| W/D Hookups | \$5       | \$25 | \$5       |

### Security

We considered the presence of various security amenities at the comparables as compared to the subject property. Security amenities include call buttons, controlled access, courtesy officers, monitoring, security alarms and security patrols. The survey range and our concluded adjustment for each amenity is summarized below.

#### Securit

| Adjustment        | Survey | Range | Concluded |
|-------------------|--------|-------|-----------|
| Call Buttons      | \$2    | \$10  | \$2       |
| Controlled Access | \$2    | \$10  | \$2       |
| Courtesy Officer  | \$2    | \$10  | \$2       |
| Monitoring        | \$2    | \$10  | \$2       |
| Security Alarms   | \$2    | \$10  | \$2       |
| Security Patrols  | \$2    | \$10  | \$2       |

## Rent Conclusion, 3BR-2.5BA-1496sf

The development of our rent conclusion for the 3BR-2.5BA-1496sf units is found below.

Our analysis included the evaluation of a total of 13 unit types found at 6 properties. We selected the 13 most comparable units to utilize as rent comparables for purposes of this analysis. A write-up for each of the properties included in this analysis is found in the Appendix.

Our analysis included the adjustments developed in the previous section. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is better, a "plus" adjustment is made. If the subject is inferior, a "minus" adjustment is made. In the table below, we summarize the adjustments and the resulting indicated rent for the top 13 comparables included in this analysis. The units that we consider most comparable are highlighted for the reader's reference.

|                   |  | Rent (  | Conclusion              |                   |                         |                                  |                       |                         |                |

## Restricted Market Rent Conclusion

Based on our evaluation of the rents at the select comparable properties, and considering the location, quality and amenities of the subject property, we conclude the following market rents for the subject property units, assuming that the subject were a restricted property:

| Restricted Market Rent Conclusion          |      |            |       |        |  |  |  |  |  |  |
|--|------|------------|-------|--------|--|--|--|--|--|--|

| Total / Average                            |      |            | 23    | \$860  |  |  |  |  |  |  |

Our analysis suggests an average restricted market rent of \$860 for the subject property.

We selected a total of 6 properties as comparables for purposes of our analysis. The average occupancy at the select rent comparables currently stands at 100 percent.

The occupancy rate of the selected rent compatrables is broken out in the tables below:

|           |            |            | Occupano   | y Rate, Select Co | mparables  |            |            |        |

Rents at rent restricted properties tend to move with median household incomes for an area. Given HUD's published median incomes, we were able to derive 1, 2 and 3-bedroom 60% of AMI rent limits for the subject's primary market area. According to our analysis, maximum 2-bedroom rents for the area grew from \$921 to \$941 since 2010. This represents an average 0.2% annual increase over this period.

# Maximum tax credit rent data for the area is found below:

Maximum Tax Credit Rents, 60% of AMI

## Achievable Rent Conclusion

The next step in our analysis is to develop an achievable rent conclusion for the subject property. Achievable rents represent the absolute highest rent permissible for the area, considering market rents, program rent limits, and any other applicable rent restrictions on the subject property.

Our analysis begins by establishing the applicable program rent limits for the subject property. Program rent limits include any applicable LIHTC and FMR rent limits. LIHTC rent limits typically apply to units benefitting from tax credit and/or bond financing. The LIHTC rent limits for applicable units at the subject property follow:

|  | LIHTC Rent | Limits     |       |            |           |          |
|--|------------|------------|-------|------------|-----------|----------|
| Unit Type / Income Limit / Rent Limit      | HOME       | Subsidized | Units | Gross Rent | Utilities | Net Rent |
| 3BR-2BA-1344sf / 60% of AMI / 40% of AMI   | No         | Yes        | 2     | \$733      | \$120     | \$613    |
| 3BR-2.5BA-1344sf / 60% of AMI / 50% of AMI | No         | Yes        | 1     | \$916      | \$120     | \$796    |
| 3BR-2.5BA-1344sf / 60% of AMI / 50% of AMI | No         | Yes        | 4     | \$916      | \$120     | \$796    |
| 3BR-2.5BA-1488sf / 60% of AMI / 50% of AMI | No         | Yes        | 2     | \$916      | \$120     | \$796    |
| 3BR-2BA-1489sf / 60% of AMI / 40% of AMI   | No         | Yes        | 1     | \$733      | \$120     | \$613    |
| 3BR-2BA-1489sf / 60% of AMI / 50% of AMI   | No         | Yes        | 1     | \$916      | \$120     | \$796    |
| 3BR-2BA-1496sf / 60% of AMI / 50% of AMI   | No         | Yes        | 1     | \$916      | \$120     | \$796    |
| 3BR-2.5BA-1496sf / 60% of AMI / 60% of AMI | No         | Yes        | 11    | \$1,100    | \$120     | \$980    |
| Total / Average                            |            |            | 23    | \$980      | \$120     | \$860    |

Our analysis suggests an average net LIHTC rent limit of \$860 for 23 applicable units at the subject property.

FMR rent limits typically apply to units benefitting from HOME funds. The FMR rent limits for applicable units at the subject property follow:

|  | FMR Rent Limits |            |       |            |           |          |  |  |  |  |  |
|--|-----------------|------------|-------|------------|-----------|----------|--|--|--|--|--|
| Unit Type / Income Limit / Rent Limit      | HOME            | Subsidized | Units | Gross Rent | Utilities | Net Rent |  |  |  |  |  |

| Total / Average                            |                 |            | -     | -          | -         | -        |  |  |  |  |  |

HOME funding is not proposed for the subject property.

Units benefitting exclusively from tax credits and/or bond financing are subject to LIHTC rent limits. Units benefitting from HOME funds in addition to tax credit and/or bond financing are subject to the lesser of LIHTC rent limits or FMR rent limits. Units benefitting from project-based rental assistance are normally limited to unrestricted market rent. With these parameters in mind, the following table sets forth the concluded program rent limits for applicable units at the subject property:

|  |      | Program Rent L | imits |       |     |         |         |
|--|------|----------------|-------|-------|-----|---------|---------|
| Unit Type / Income Limit / Rent Limit      | HOME | Subsidized     | Units | LIHTC | FMR | Market  | Program |
| 3BR-2BA-1344sf / 60% of AMI / 40% of AMI   | No   | Yes            | 2     | \$613 | -   | \$1,550 | \$1,550 |
| 3BR-2.5BA-1344sf / 60% of AMI / 50% of AMI | No   | Yes            | 1     | \$796 | -   | \$1,550 | \$1,550 |
| 3BR-2.5BA-1344sf / 60% of AMI / 50% of AMI | No   | Yes            | 4     | \$796 | -   | \$1,550 | \$1,550 |
| 3BR-2.5BA-1488sf / 60% of AMI / 50% of AMI | No   | Yes            | 2     | \$796 | -   | \$1,550 | \$1,550 |
| 3BR-2BA-1489sf / 60% of AMI / 40% of AMI   | No   | Yes            | 1     | \$613 | -   | \$1,550 | \$1,550 |
| 3BR-2BA-1489sf / 60% of AMI / 50% of AMI   | No   | Yes            | 1     | \$796 | -   | \$1,550 | \$1,550 |
| 3BR-2BA-1496sf / 60% of AMI / 50% of AMI   | No   | Yes            | 1     | \$796 | -   | \$1,550 | \$1,550 |
| 3BR-2.5BA-1496sf / 60% of AMI / 60% of AMI | No   | Yes            | 11    | \$980 | -   | \$1,550 | \$1,550 |
| Total / Average                            |      |                | 23    | \$860 | -   | \$1,550 | \$1,550 |

Our analysis suggests an average program rent limit of \$1,550 for 23 applicable units at the subject property.

Now that we have established program rent limits, we are in a position to develop an achievable rent conclusion for the subject property. Achievable rents represent the absolute highest rent permissible for the area, considering unrestricted and restricted market rents, program rent limits, and any other applicable rent restrictions on the subject property. The following table summarizes our findings:

| Achievable Rents                           |    |            |       |         |              |            |            |          |           |  |  |  |
|--|----|------------|-------|---------|--------------|------------|------------|----------|-----------|--|--|--|
| Unit Type / Income Limit / Rent Limit      |    | Subsidized | Units | Program | Unrestricted | Restricted | Achievable | Proposed | Advantage |  |  |  |
| 3BR-2BA-1344sf / 60% of AMI / 40% of AMI   | No | Yes        | 2     | \$1,550 | \$1,550      | \$860      | \$1,550    | \$850    | 45.2%     |  |  |  |
| 3BR-2.5BA-1344sf / 60% of AMI / 50% of AMI | No | Yes        | 1     | \$1,550 | \$1,550      | \$860      | \$1,550    | \$850    | 45.2%     |  |  |  |
| 3BR-2.5BA-1344sf / 60% of AMI / 50% of AMI | No | Yes        | 4     | \$1,550 | \$1,550      | \$860      | \$1,550    | \$850    | 45.2%     |  |  |  |
| 3BR-2.5BA-1488sf / 60% of AMI / 50% of AMI | No | Yes        | 2     | \$1,550 | \$1,550      | \$860      | \$1,550    | \$850    | 45.2%     |  |  |  |
| 3BR-2BA-1489sf / 60% of AMI / 40% of AMI   | No | Yes        | 1     | \$1,550 | \$1,550      | \$860      | \$1,550    | \$850    | 45.2%     |  |  |  |
| 3BR-2BA-1489sf / 60% of AMI / 50% of AMI   | No | Yes        | 1     | \$1,550 | \$1,550      | \$860      | \$1,550    | \$850    | 45.2%     |  |  |  |
| 3BR-2BA-1496sf / 60% of AMI / 50% of AMI   | No | Yes        | 1     | \$1,550 | \$1,550      | \$860      | \$1,550    | \$850    | 45.2%     |  |  |  |
| 3BR-2.5BA-1496sf / 60% of AMI / 60% of AMI | No | Yes        | 11    | \$1,550 | \$1,550      | \$860      | \$1,550    | \$850    | 45.2%     |  |  |  |
| Total / Average                            |    |            | 23    | \$1,550 | \$1,550      | \$860      | \$1,550    | \$850    | 45.2%     |  |  |  |

Our analysis suggests an average achievable rent of \$1,550 for the subject property. This is compared with an average proposed rent of \$850, yielding an achievable rent advantage of 45.2 percent. Overall, the subject property appears to be priced at or below achievable rents for the area.

Finally, assuming no rent subsidies, we arrive at the following achievable rents for units at this property:

| Achievable Rents, No Rent Subsidies        |      |            |       |         |              |            |            |          |           |  |  |
|--|------|------------|-------|---------|--------------|------------|------------|----------|-----------|--|--|
| Unit Type / Income Limit / Rent Limit      | HOME | Subsidized | Units | Program | Unrestricted | Restricted | Achievable | Proposed | Advantage |  |  |
| 3BR-2BA-1344sf / 60% of AMI / 40% of AMI   | No   | No         | 2     | \$613   | \$1,550      | \$860      | \$613      | \$850    | -38.7%    |  |  |
| 3BR-2.5BA-1344sf / 60% of AMI / 50% of AMI | No   | No         | 1     | \$796   | \$1,550      | \$860      | \$796      | \$850    | -6.8%     |  |  |
| 3BR-2.5BA-1344sf / 60% of AMI / 50% of AMI | No   | No         | 4     | \$796   | \$1,550      | \$860      | \$796      | \$850    | -6.8%     |  |  |
| 3BR-2.5BA-1488sf / 60% of AMI / 50% of AMI | No   | No         | 2     | \$796   | \$1,550      | \$860      | \$796      | \$850    | -6.8%     |  |  |
| 3BR-2BA-1489sf / 60% of AMI / 40% of AMI   | No   | No         | 1     | \$613   | \$1,550      | \$860      | \$613      | \$850    | -38.7%    |  |  |

#### **DEMAND ANALYSIS**

# Overview

In this section we evaluate demand for the subject property using the recommended demand methodology promulgated by the National Council of Housing Market Analysts (NCHMA). For purposes of this analysis, we define demand as the number of income-qualified renter households (by household size and unit type) that would qualify to live at the subject property at the lesser of the developer's proposed rents or achievable rents.

Our analysis begins by developing a breakdown of the number of renter households, by income, by size as of the date of market entry for this development. This breakdown, which utilizes demographic data presented earlier in this report, is presented below:

Renter Households, by Income, by Size

|     | 2023 | \$        |          |          |          | 2025     |          |           |       |
|-----|------|-----------|----------|----------|----------|----------|----------|-----------|-------|
| Min |      | Max       | 1 Person | 2 Person | 3 Person | 4 Person | 5 Person | 6+ Person | Total |
| \$0 | to   | \$9,999   | 772      | 264      | 141      | 55       | 16       | 2         | 1,250 |
| \$0 | to   | \$19,999  | 1,790    | 621      | 283      | 283 95   |          | 7         | 2,835 |
| \$0 | to   | \$29,999  | 2,405    | 1,074    | 469      | 205      | 99       | 32        | 4,286 |
| \$0 | to   | \$39,999  | 2,844    | 1,309    | 630      | 273      | 155      | 53        | 5,265 |

| \$0 | or   | more      | 3,784    | 2,241    | 1,128    | 723      | 402      | 128       | 8,406 |

Source: ESRI & Ribbon Demographics

Our analysis includes an estimate of demand along with capture rate and penetration rate estimates. Capture rates were computed two ways: (1) On a gross basis (the number of proposed units divided by qualified demand) and (2) On a net basis (the number of proposed units divided by qualified demand minus competing & pipeline units). Penetration rates are defined as the number of proposed units plus competing & pipeline units divided by incomequalified demand. In the following pages we provide detailed listings of competing & pipeline units in the market area broken by unit type.

Competing & Pipeline Units, 3-Bedroom Units

Our analysis suggests demand for a total of 4,084 size- and income-qualified units in the market area.

Please note: This unit-level demand estimate does not account for income band overlap with other units. Project-level demand estimates taking these factors into consideration will be developed later.

# **Demand Estimate, Subsidized**

In this section we account for income-band overlap and develop a demand estimate for the subsidized units at the subject property.

|            | Renter Households, by Income, by Size   |           |          |          |          |          |          |           |     |    |  |  |

Demand Estimate 4,084

Our analysis suggests demand for a total of 4,084 size- and income-qualified units in the market area.

Please note: This demand estimate does not account for income band overlap at the project level. A demand estimate taking this into consideration will be developed later.

# **Demand Estimate, Project-Level**

In this section we account for income-band overlap and develop a project-level demand estimate for the subject property.

Demand Estimate 4,084

Our analysis suggests project-level demand for a total of 4,084 size- and income-qualified units in the market area.

## **Capture Rates**

In this section, we summarize our demand conclusions and estimate the capture rate for the subject property. Our analysis begins by summarizing the estimated number of vacant subject property units on the date of market entry.

|     | Subject Property Units (Total) |     |     |     |     |     |     |     |     |  |  |  |
|-----|--------------------------------|-----|-----|-----|-----|-----|-----|-----|-----|--|--|--|
|     | Sub                            | 30% | 40% | 50% | 60% | 70% | 80% | Mkt | Tot |  |  |  |
| 0BR |                                |     |     |     |     |     |     |     |     |  |  |  |
| 1BR |                                |     |     |     |     |     |     |     |     |  |  |  |
| 2BR |                                |     |     |     |     |     |     |     |     |  |  |  |
| 3BR | 23                             |     |     |     |     |     |     |     | 23  |  |  |  |
| 4BR |                                |     |     |     |     |     |     |     |     |  |  |  |
| Tot | 22                             |     |     |     |     |     |     |     | 22  |  |  |  |

| Subject Property Units (Vacant at Market Entry) |     |     |     |     |     |     |     |     |     |  |
|---|-----|-----|-----|-----|-----|-----|-----|-----|-----|--|
|   | Sub | 30% | 40% | 50% | 60% | 70% | 80% | Mkt | Tot |  |
| 0BR   |     |     |     |     |     |     |     |     |     |  |
| 1BR   |     |     |     |     |     |     |     |     |     |  |
| 2BR   |     |     |     |     |     |     |     |     |     |  |
| 3BR   | 23  |     |     |     |     |     |     |     | 23  |  |
| 4BR   |     |     |     |     |     |     |     |     |     |  |
| Tot   | 23  |     |     |     |     |     |     |     | 23  |  |

The next step in our analysis is to summarize the demand conclusions derived previously. For purposes of this analysis, we define demand as age- and income- qualified renter households for each of the unit types proposed at the subject property. Unit-level demand estimates are found in the body of the chart found below; project-level demand estimates are found in the column and row totals.

Please note: Because of income-band overlap, unit-level demand may not add up to project-level demand. The overlap, which was quantified in the demand estimates presented earlier, has been accounted for in our estimates of project-level demand.

|     | Gross Demand |     |     |     |     |     |     |     |       |  |  |
|-----|--------------|-----|-----|-----|-----|-----|-----|-----|-------|--|--|
|     | Sub          | 30% | 40% | 50% | 60% | 70% | 80% | Mkt | Tot   |  |  |
| 0BR |              |     |     |     |     |     |     |     |       |  |  |
| 1BR |              |     |     |     |     |     |     |     |       |  |  |
| 2BR |              |     |     |     |     |     |     |     |       |  |  |
| 3BR | 4,084        |     |     |     |     |     |     |     | 4,084 |  |  |
| 4BR |              |     |     |     |     |     |     |     |       |  |  |
| Tot | 4,084        |     |     |     |     |     |     |     | 4,084 |  |  |

The next step in our analysis is to compute the capture rate for the project. For purposes of this computation, we define capture rate as the number of subject property units divided by gross demand. Underwriters often utilize capture rate limits of 10 to 25 percent using this methodology. Our estimates are presented below:

| Capture Rates (Subject Property Units / Gross Demand) |      |     |     |     |     |     |     |     |      |  |  |
|---|------|-----|-----|-----|-----|-----|-----|-----|------|--|--|
|   | Sub  | 30% | 40% | 50% | 60% | 70% | 80% | Mkt | Tot  |  |  |
| 0BR   |      |     |     |     |     |     |     |     |      |  |  |
| 1BR   |      |     |     |     |     |     |     |     |      |  |  |
| 2BR   |      |     |     |     |     |     |     |     |      |  |  |
| 3BR   | 0.6% |     |     |     |     |     |     |     | 0.6% |  |  |
| 4BR   |      |     |     |     |     |     |     |     |      |  |  |
| Tot   | 0.6% |     |     |     |     |     |     |     | 0.6% |  |  |

The next step in our analysis is to tabulate the number of vacant competing & pipeline units in the market area by

unit/income type. This information will be used to further refine our capture rate estimate for the subject property. A table showing the distribution of vacant competing & pipeline units is found below.

|     | vacant Competing & Pipeline Units |     |     |     |     |     |     |     |     |  |  |  |
|-----|-----------------------------------|-----|-----|-----|-----|-----|-----|-----|-----|--|--|--|
|     | Sub                               | 30% | 40% | 50% | 60% | 70% | 80% | Mkt | Tot |  |  |  |
| 0BR |                                   |     |     |     |     |     |     |     |     |  |  |  |
| 1BR |                                   |     |     |     |     |     |     |     |     |  |  |  |
| 2BR |                                   |     |     |     |     |     |     |     |     |  |  |  |
| 3BR | 6                                 |     |     |     |     |     |     |     | 6   |  |  |  |

The next step in our analysis is to subtract the number of vacant competing & pipeline units from gross demand to arrive at a net demand estimate for the subject property units. As described earlier, unit-level net demand estimates are found in the body of the chart found below; project-level net demand estimates are found in the column and row totals.

Please note: Because of income-band overlap, unit-level net demand may not add up to project-level net demand. The overlap, which was quantified in the demand estimates presented earlier, has been accounted for in our estimates of project-level net demand.

|     | Net Demand (Gross Demand - Vacant Competing & Pipeline Units) |     |     |     |     |     |     |     |       |  |  |  |
|-----|---|-----|-----|-----|-----|-----|-----|-----|-------|--|--|--|
|     | Sub   | 30% | 40% | 50% | 60% | 70% | 80% | Mkt | Tot   |  |  |  |
| 0BR |   |     |     |     |     |     |     |     |       |  |  |  |
| 1BR |   |     |     |     |     |     |     |     |       |  |  |  |
| 2BR |   |     |     |     |     |     |     |     |       |  |  |  |
| 3BR | 4,078   |     |     |     |     |     |     |     | 4,078 |  |  |  |
| 4BR |   |     |     |     |     |     |     |     |       |  |  |  |
| Tot | 4,078   |     |     |     |     |     |     |     | 4,078 |  |  |  |

The next step in our analysis is to compute the capture rate for the project. For purposes of this computation, we define capture rate as the number of subject property units divided by net demand. A capture rate in excess of 20 percent is considered excessive using this methodology. Our estimates are presented below:

| Capture Rates (Subject Property Units / Net Demand) |      |     |     |     |     |     |     |     |      |  |  |
|---|------|-----|-----|-----|-----|-----|-----|-----|------|--|--|
|   | Sub  | 30% | 40% | 50% | 60% | 70% | 80% | Mkt | Tot  |  |  |
| 0BR   |      |     |     |     |     |     |     |     |      |  |  |
| 1BR   |      |     |     |     |     |     |     |     |      |  |  |
| 2BR   |      |     |     |     |     |     |     |     |      |  |  |
| 3BR   | 0.6% |     |     |     |     |     |     |     | 0.6% |  |  |
| 4BR   |      |     |     |     |     |     |     |     |      |  |  |
| Tot   | 0.6% |     |     |     |     |     |     |     | 0.6% |  |  |

In our opinion, the estimated project-level capture rate suggests an appropriate number of units for the subject property. The unit level capture rates suggest an appropriate mix of units for the subject property.

#### **Penetration Rates**

In this section, we summarize our demand conclusions and estimate the penetration rate for the subject property. Our analysis begins by summarizing the estimated number of vacant subject property units on the date of market entry.

|     | Subject Property Units (Total) |     |     |     |     |     |     |     |     |  |  |  |  |
|-----|--------------------------------|-----|-----|-----|-----|-----|-----|-----|-----|--|--|--|--|
|     | Sub                            | 30% | 40% | 50% | 60% | 70% | 80% | Mkt | Tot |  |  |  |  |
| 0BR |                                |     |     |     |     |     |     |     |     |  |  |  |  |
| 1BR |                                |     |     |     |     |     |     |     |     |  |  |  |  |
| 2BR |                                |     |     |     |     |     |     |     |     |  |  |  |  |
| 3BR | 23                             |     |     |     |     |     |     |     | 23  |  |  |  |  |
| 4BR |                                |     |     |     |     |     |     |     |     |  |  |  |  |
| Tot | 23                             |     |     |     |     |     |     |     | 23  |  |  |  |  |

| Subject Property Units (Vacant at Market Entry) |     |     |     |     |     |     |     |     |     |  |  |
|---|-----|-----|-----|-----|-----|-----|-----|-----|-----|--|--|
|   | Sub | 30% | 40% | 50% | 60% | 70% | 80% | Mkt | Tot |  |  |
| 0BR   |     |     |     |     |     |     |     |     |     |  |  |
| 1BR   |     |     |     |     |     |     |     |     |     |  |  |
| 2BR   |     |     |     |     |     |     |     |     |     |  |  |
| 3BR   | 23  |     |     |     |     |     |     |     | 23  |  |  |
| 4BR   |     |     |     |     |     |     |     |     |     |  |  |
| Tot   | 23  |     |     |     |     |     |     |     | 23  |  |  |

The next step in our analysis is to summarize the demand conclusions derived previously. For purposes of this analysis, we define demand as age- and income- qualified renter households for each of the unit types proposed at the subject property. Unit-level demand estimates are found in the body of the chart found below; project-level demand estimates are found in the column and row totals.

Please note: Because of income-band overlap, unit-level demand may not add up to project-level demand. The overlap, which was quantified in the demand estimates presented earlier, has been accounted for in our estimates of project-level demand.

|     | Gross Demand |     |     |     |     |     |     |     |       |  |  |  |  |
|-----|--------------|-----|-----|-----|-----|-----|-----|-----|-------|--|--|--|--|
|     | Sub          | 30% | 40% | 50% | 60% | 70% | 80% | Mkt | Tot   |  |  |  |  |
| 0BR |              |     |     |     |     |     |     |     |       |  |  |  |  |
| 1BR |              |     |     |     |     |     |     |     |       |  |  |  |  |
| 2BR |              |     |     |     |     |     |     |     |       |  |  |  |  |
| 3BR | 4,084        |     |     |     |     |     |     |     | 4,084 |  |  |  |  |
| 4BR |              |     |     |     |     |     |     |     |       |  |  |  |  |
| Tot | 4,084        |     |     |     |     |     |     |     | 4,084 |  |  |  |  |

The next step in our analysis is to tabulate the number of competing & pipeline units in the market area by unit/income type. This information will be used to derive our penetration rate estimate for the subject property. A table showing the distribution of competing & pipeline units is found below.

| Competing & Pipeline Units |     |     |     |     |     |     |     |     |     |  |  |  |
|----------------------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|--|--|--|
|                            | Sub | 30% | 40% | 50% | 60% | 70% | 80% | Mkt | Tot |  |  |  |
| 0BR                        |     |     |     |     |     |     |     |     |     |  |  |  |
| 1BR                        |     |     |     |     |     |     |     |     |     |  |  |  |

| Tot                        | 95  |     |     |     |     |     |     |     | 95  |  |  |  |

The next step in our analysis is to compute inclusive supply for the market area by unit/income type. Inclusive

supply will be taken into account in our penetration rate estimate for the subject property. For purposes of this estimate, inclusive supply consists of vacant subject property units plus competing & pipeline units.

Inclusive Supply (Subject Property Units + Competing & Pipeline Units) 30% 40% 50% 60% 70% 80% Sub Mkt Tot 0BR 1BR 2BR 3BR 118 118

The next step in our analysis is to compute the penetration rate for the project. For purposes of this computation, penetration rate is defined as inclusive supply divided by gross demand. A penetration rate in excess of 100 percent is considered excessive using this methodology. Our estimates are presented below:

| Penetration Rates (Inclusive Supply / Gross Demand) |      |     |     |     |     |     |     |     |      |  |  |  |
|---|------|-----|-----|-----|-----|-----|-----|-----|------|--|--|--|
|   | Sub  | 30% | 40% | 50% | 60% | 70% | 80% | Mkt | Tot  |  |  |  |
| 0BR   |      |     |     |     |     |     |     |     |      |  |  |  |
| 1BR   |      |     |     |     |     |     |     |     |      |  |  |  |
| 2BR   |      |     |     |     |     |     |     |     |      |  |  |  |
| 3BR   | 2.9% |     |     |     |     |     |     |     | 2.9% |  |  |  |
| 4BR   |      |     |     |     |     |     |     |     |      |  |  |  |
| Tot   | 2.9% |     |     |     |     |     |     |     | 2.9% |  |  |  |

In our opinion, the estimated project-level penetration rate suggest an appropriate number of units for the subject property. The unit-level penetration rates suggest an appropriate mix of units for the subject property.

# **Absorption Period**

In this section, we estimate the absorption period for the subject property. Our analysis begins by summarizing the estimated number of vacant subject property units on the date of market entry.

|     |     |     | Subject                | Property Unit       | s (Total)              |     |     |       |
|-----|-----|-----|------------------------|---------------------|------------------------|-----|-----|-------|
|     | Sub | 30% | 40%                    | 50%                 | 60%                    | 70% | 80% | Mkt   |
| 0BR |     |     |                        |                     |                        |     |     |       |
| 1BR |     |     |                        |                     |                        |     |     |       |
| 2BR |     |     |                        |                     |                        |     |     |       |
| 3BR | 23  |     |                        |                     |                        |     |     |       |
| 4BR |     |     |                        |                     |                        |     |     |       |

| 1BR |     |     |                        |                     |                        |     |     |       |
| 2BR |     |     |                        |                     |                        |     |     |       |
| 3BR | 23  |     |                        |                     |                        |     |     |       |
|     | 23  |     |                        |                     |                        |     |     |       |

The next step in our analysis is to summarize the demand conclusions derived previously. For purposes of this analysis, we define demand as age- and income- qualified renter households for each of the unit types proposed at the subject property. Our analysis uses the unit-level demand estimates derived previously.

| Gross Demand |       |     |     |     |     |     |     |     |  |  |  |
|--------------|-------|-----|-----|-----|-----|-----|-----|-----|--|--|--|
|              | Sub   | 30% | 40% | 50% | 60% | 70% | 80% | Mkt |  |  |  |
| 0BR          |       |     |     |     |     |     |     |     |  |  |  |
| 1BR          |       |     |     |     |     |     |     |     |  |  |  |
| 2BR          |       |     |     |     |     |     |     |     |  |  |  |
| 3BR          | 4,084 |     |     |     |     |     |     |     |  |  |  |
| 4BR          |       |     |     |     |     |     |     |     |  |  |  |

The next step in our analysis is to apply an annual growth & movership rate to derive an annual rental household growth & movership estimate for the market area. Our estimates are found in the tables below.

| ship Rate |
|-----------|
| -0.1%     |
| 28.4%     |
| 28.4%     |
|           |

The next step in our analysis is to account for secondary market area migration in our annual rental household growth & movership estimate for the market area. Our estimates are found in the tables below.

| Secondary Market Area |  |
|-----------------------|--|
| 200/                  |  |

Growth & Movership Estimate

|     | o o o o o o o o o o o o o o o o o o o |     |     |     |     |     |     |     |  |  |  |  |
|-----|---------------------------------------|-----|-----|-----|-----|-----|-----|-----|--|--|--|--|
|     | Sub                                   | 30% | 40% | 50% | 60% | 70% | 80% | Mkt |  |  |  |  |
| 0BR |                                       |     |     |     |     |     |     |     |  |  |  |  |
| 1BR |                                       |     |     |     |     |     |     |     |  |  |  |  |
| 2BR |                                       |     |     |     |     |     |     |     |  |  |  |  |
| 3BR | 1,448                                 |     |     |     |     |     |     |     |  |  |  |  |
| 4BR |                                       |     |     |     |     |     |     |     |  |  |  |  |

The next step in our analysis is to estimate fair share, or the proportion of growth and movership that we would expect the subject property to capture. The fair share analysis is used extensively in single-family, multifamily, commercial, and retail market studies. The books entitled <u>Market Analysis for Valuation Appraisals</u> (1994, Appraisal Institute) and <u>Market Analysis and Highest & Best Use</u> (2005, Appraisal institute) provide a good overview of this technique and its application to a variety of property types.

Based on our review of the subject and competing properties, along with their relative conditions/locations, we arrive at the following fair share estimates for the various unit/income types at the subject property.

| 2 1 1 2 3 1 2 1 2 1 2 1 2 1 2 1 2 1 2 1 |     |     |     |     |     |     |     |     |  |  |
|---|-----|-----|-----|-----|-----|-----|-----|-----|--|--|
|   | Sub | 30% | 40% | 50% | 60% | 70% | 80% | Mkt |  |  |
| 0BR                                     |     |     |     |     |     |     |     | 4   |  |  |
| 1BR                                     | 8   | 1   |     | 2   | 4   |     | 1   | 13  |  |  |
| 2BR                                     | 12  |     |     | 4   | 9   |     | 1   | 22  |  |  |
| 3BR                                     | 8   |     |     | 4   | 8   |     |     | 5   |  |  |
| 4BR                                     | 3   |     |     |     |     |     |     |     |  |  |

Fair Share

|     |       |     |     | i ali Silale |     |     |     |     |
|-----|-------|-----|-----|--------------|-----|-----|-----|-----|
|     | Sub   | 30% | 40% | 50%          | 60% | 70% | 80% | Mkt |
| 0BR |       |     |     |              |     |     |     |     |
| 1BR |       |     |     |              |     |     |     |     |
| 2BR |       |     |     |              |     |     |     |     |
| 3BR | 10.0% |     |     |              |     |     |     |     |
| 4BR |       |     |     |              |     |     |     |     |

Applying the concluded fair share estimates to annual growth & movership and dividing by twelve yields the following monthly absorption rate estimates for the various unit/income types at the subject property.

Monthly Absorption Rate Estimate

| Monthly Abbot Phon Made Edinate |      |     |     |     |     |     |     |     |  |  |
|---------------------------------|------|-----|-----|-----|-----|-----|-----|-----|--|--|
|                                 | Sub  | 30% | 40% | 50% | 60% | 70% | 80% | Mkt |  |  |
| 0BR                             |      |     |     |     |     |     |     |     |  |  |
| 1BR                             |      |     |     |     |     |     |     |     |  |  |
| 2BR                             |      |     |     |     |     |     |     |     |  |  |
| 3BR                             | 12.1 |     |     |     |     |     |     |     |  |  |
| 4BR                             |      |     |     |     |     |     |     |     |  |  |

The next step in our analysis is to estimate stabilized occupancy by unit/income type for the subject property. These estimates, which were based on data previously presented in the supply analysis and rent comparability analysis sections of this report, are found below.

| 2BR |                                   |     |     |     |     |     |     |     |  |
| 3BR | 97%                               |     |     |     |     |     |     |     |  |
| 4BR |                                   |     |     |     |     |     |     |     |  |

Applying the stabilized occupancy rate estimates to the number of vacant subject property units at market entry, yields the number of occupied units by unit/income type at stabilization as set forth below.

| Occupied Units at Stabilization | Occup | ied Units | at Stabiliz | ation |
|---------------------------------|-------|-----------|-------------|-------|
|---------------------------------|-------|-----------|-------------|-------|

|     | Sub | 30% | 40% | 50% | 60% | 70% | 80% | Mkt |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| 0BR |     |     |     |     |     |     |     |     |
| 1BR |     |     |     |     |     |     |     |     |
| 2BR |     |     |     |     |     |     |     |     |
| 3BR | 22  |     |     |     |     |     |     |     |
| 4BR |     |     |     |     |     |     |     |     |

Dividing the number of occupied units at stabilization by the monthly absorption rate yields an absorption period estimate by unit/income type for the various units at the subject property. Underwriters often utilize absorption period limits of 12 to 18 months for projects similar to the subject property. Our absorption period estimates are found below.

Absorption Period (Months to Stabilization)

|     | Sub | 30% | 40% | 50% | 60% | 70% | 80% | Mkt |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| 0BR |     |     |     |     |     |     |     |     |
| 1BR |     |     |     |     |     |     |     |     |
| 2BR |     |     |     |     |     |     |     |     |
| 3BR | 2   |     |     |     |     |     |     |     |
| 4BR |     |     |     |     |     |     |     |     |

Our analysis suggests that the subject property will stabilize at 97 percent occupancy. We estimate 2 months of absorption and an average absorption rate of 12.1 units per month for this project. In our opinion, the absorption period suggests an appropriate number and mix of units for the subject property.

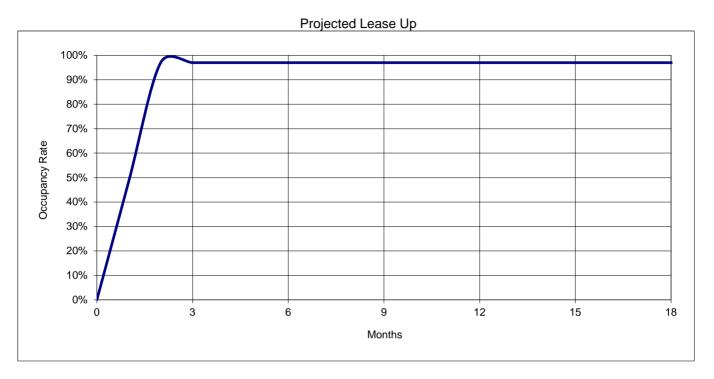

Absorption rates for multifamily properties depend on a variety of factors: (1) The competitive environment in which the property resides; (2) The pricing of the subject property units relative to competing units, (3) The presence of rent or income restrictions at the subject property; and (4) The availability of any rent concessions or rental assistance at the subject property. Subsidized properties normally lease up at a rate of 15-20 units per month. Unsubsidized properties with rent and income restrictions tyically fill at a rate of 5-10 units per month. Market rate properties normally lease up at a rate of 10-15 units per month.

As part of our analysis, we inquired about the absorption history for every property we surveyed. The following list summarizes our findings:

| Key | Project                         | Built | Renovated | Rent Type  | Occ Type | Tot Units | Ab Rte |
|-----|---------------------------------|-------|-----------|------------|----------|-----------|--------|
| 044 | Highland View Apartments        | 1983  | 2013      | Restricted | Family   | 44        | 44.0   |
| 079 | Ridgecrest Town Apartments      | 2008  | na        | Restricted | Family   | 72        | 62.0   |
| 081 | Riverside Place Apartments      | 1923  | 2011      | Restricted | Family   | 22        | 3.8    |

| 107 | Whites Mill Point II Apartments | 2006  | 2023      | Restricted | Family   | 32        | 32.0   |

## **Absorption Analysis**

In this section, we analyze the anticipated lease up for the subject property. We begin our analysis by taking the the absorption period conclusions from the previous section and restating them graphically as illustrated below.

Our analysis suggests that the subject property will achieve 70 percent occupancy in 1 months, 80 percent occupancy in 1 months, and 90 percent occupancy in 1 months. We anticipate that the subject property will stabilize at 97 percent occupancy in 2 months.

It is important to note that this analysis does not account for pent-up demand, pre-leasing efforts or rent concessions. In our opinion, an effective pre-leasing effort could result in a month-for-month reduction in the estimated absorption period for this project. In addition, any concessions or rent subsidies not accounted for already in this analysis could cut capture rates and absorption periods significantly.

## VHDA DEMAND ANALYSIS

## Overview

In this section we evaluate demand for the subject property using the VHDA demand methodology. For purposes of this analysis, we define VHDA demand as the number of new income-qualified and existing income-qualified overburdened and substandard renter households that would qualify to live at the subject property at the lesser of achievable rents or the sponsor's proposed rents. Our analysis accounts for any rent subsidies for the subject property.

Our analysis begins by developing a breakdown of the number of renter households, by income, by size as of the date of market entry for this development. This breakdown, which utilizes demographic data presented earlier in this report, is presented below:

Renter Households, by Income, by Size

|     | 2023 | \$        | 2023     |          |          |          |          |           |       |  |
|-----|------|-----------|----------|----------|----------|----------|----------|-----------|-------|--|

# Demand Estimate, 3-Bedroom, Subsidized, 60% of AMI

In this section we estimate demand for the 3-Bedroom / Subsidized / 60% of AMI units at the subject property. Our analysis assumes a total of 23 units, 23 of which are anticipated to be vacant on market entry in 2023. Our analysis assumes a 35% income qualification ratio and 5-person households.

| Unit Details                 |                   |  |  |  |  |  |  |

|                          |                         |           | Demand Est | timate        |          | 4,119    |          |           |  |  |  |

Our analysis suggests demand for a total of 4,119 size- and income-qualified units in the market area.

Please note: This unit-level demand estimate does not account for income band overlap with other units. Project-level demand estimates taking these factors into consideration will be developed later.

# **Demand Estimate, Subsidized**

In this section we account for income-band overlap and develop a demand estimate for the subsidized units at the subject property.

Our analysis suggests demand for a total of 4,119 size- and income-qualified units in the market area.

**Demand Estimate** 

Please note: This demand estimate does not account for income band overlap at the project level. A demand estimate taking this into consideration will be developed later.

4,119

#### **Demand Estimate**

In this section, we derive our overburdened demand and capture rate estimates for the subject property. Our analysis, which begins with the income-qualified renter household estimates developed above, is found below.

|     | Income Qualified Renter Households |  |  |  |  |  |  |  |  |  |
|-----|------------------------------------|--|--|--|--|--|--|--|--|--|
|     | Sub 30% 40% 50% 60% 70% 80% M      |  |  |  |  |  |  |  |  |  |
| Tot | 4,119                              |  |  |  |  |  |  |  |  |  |

The next step in our analysis is to account for 2 years of growth to estimate the demand stemming from new income qualified rental households. Our estimates are found below.

Annual Renter Household Growth Rate
-0.1%

|     |     |     | New | Rental House | holds |     |     |     |
|-----|-----|-----|-----|--------------|-------|-----|-----|-----|
|     | Sub | 30% | 40% | 50%          | 60%   | 70% | 80% | Mkt |
| Tot | -7  |     |     |              |       |     |     |     |

The next step in our analysis is to estimate existing demand stemming from income-qualified overburdened renter households in this market area. Our estimates are found below.

|     | 26.0% |     |               |               |              |     |     |     |  |
|-----|-------|-----|---------------|---------------|--------------|-----|-----|-----|--|
|     |       |     | Existing Hous | eholds - Rent | Overburdened |     |     |     |  |
|     | Sub   | 30% | 40%           | 50%           | 60%          | 70% | 80% | Mkt |  |
| Tot | 1,072 |     |               |               |              |     |     |     |  |

The next step in our analysis is to estimate existing demand stemming from income-qualified substandard renter households in this market area. Our estimates are found below.

|     |     | _   |            |                |            |     |     |     |
|-----|-----|-----|------------|----------------|------------|-----|-----|-----|
|     |     |     |            |                |            |     |     |     |
|     |     |     |            |                |            |     |     |     |
|     |     |     | Existing H | ouseholds - Si | ubstandard |     |     |     |
|     | Sub | 30% | 40%        | 50%            | 60%        | 70% | 80% | Mkt |
| Tot | 143 |     |            |                |            |     |     |     |

The next step in our analysis is to account for elderly homeowners likely to convert to rental housing. This component may not comprise more than 20 percent of total demand. Our estimates are found below.

|     | Elderly Homeowners Likely to Convert to Rental Housing |  |  |  |  |  |  |  |  |
|-----|--|--|--|--|--|--|--|--|--|
|     | Sub 30% 40% 50% 60% 70% 80% Mkt                        |  |  |  |  |  |  |  |  |
| Tot |  |  |  |  |  |  |  |  |  |

The next step in our analysis is to account for existing qualifying tenants likely to remain after renovation. Our estimates are found below.

|     |   |     | Subject | Property Unit | s (Total) |     |     |     |  |  |
|-----|---|-----|---------|---------------|-----------|-----|-----|-----|--|--|
|     | Sub         30%         40%         50%         60%         70%         80%         Mkt |     |         |               |           |     |     |     |  |  |
| Tot | 23  |     |         |               |           |     |     |     |  |  |
|     | Existing Qualifying Tenants Likely to Remain after Renovation                           |     |         |               |           |     |     |     |  |  |
|     | Sub   | 30% | 40%     | 50%           | 60%       | 70% | 80% | Mkt |  |  |
| Tot |   |     |         |               |           |     |     |     |  |  |

The next step in our analysis is to tally up total demand for the subject property. Our estimates are found below.

|     | Total Demand                  |  |  |  |  |  |  |     |  |
|-----|-------------------------------|--|--|--|--|--|--|-----|--|
|     | Sub 30% 40% 50% 60% 70% 80% M |  |  |  |  |  |  | Mkt |  |
| Tot | 1,208                         |  |  |  |  |  |  |     |  |

The next step in our analysis is to tabulate the number of vacant competing & pipeline units in the market area by unit/income type. This information will be used to further refine our capture rate estimate for the subject property. A table showing the distribution of vacant competing & pipeline units is found below.

| Vacant Competing & Pipeline Units |   |  |  |  |  |  |     |  |  |
|-----------------------------------|---|--|--|--|--|--|-----|--|--|
| Sub 30% 40% 50% 60% 70% 80% Mk    |   |  |  |  |  |  | Mkt |  |  |
| Tot                               | 6 |  |  |  |  |  |     |  |  |

The next step in our analysis is to subtract the number of vacant competing & pipeline units from total demand to arrive at a net demand estimate for the subject property. Our estimates are found below.

| Net Demand (Total Demand - Vacant Competing & Pipeline Units) |                               |  |  |  |  |  |  |   |
|---|-------------------------------|--|--|--|--|--|--|---|
|   | Sub 30% 40% 50% 60% 70% 80% M |  |  |  |  |  |  |   |
| Tot   | 1,202                         |  |  |  |  |  |  | _ |

The next step in our analysis is to compute the capture rate for the project. For purposes of this computation, we define capture rate as the total number of subject property units divided by net demand. Underwriters often utilize capture rate limits of 10 to 20 percent using this methodology. Our estimates are presented below:

|   | Capture Rates (Subject Property Units / Net Demand) |      |     |     |     |     |     |     |     |
|---|---|------|-----|-----|-----|-----|-----|-----|-----|
|   |   | Sub  | 30% | 40% | 50% | 60% | 70% | 80% | Mkt |
| _ | Tot   | 1.9% |     |     |     |     |     |     |     |

Our findings are summarized below.

| Project-Wide Capture Rate - LIHTC Units  | 1.9%     |
|--|----------|
| Project-Wide Capture Rate - Market Units |          |
| Project-Wide Capture Rate - All Units    | 1.9%     |
| Project-Wide Absorption Period (Months)  | 2 months |

Please note: Project-wide capture rate estimates do not account for income band overlap at the project level.

# VHDA DEMAND ANALYSIS (UNSUBSIDIZED)

## Overview

In this section we evaluate demand for the subject property using the VHDA demand methodology. For purposes of this analysis, we define VHDA demand as the number of new income-qualified and existing income-qualified overburdened and substandard renter households that would qualify to live at the subject property at the lesser of achievable rents or the sponsor's proposed rents. Our analysis ignores any rent subsidies for the subject property.

Our analysis begins by developing a breakdown of the number of renter households, by income, by size as of the date of market entry for this development. This breakdown, which utilizes demographic data presented earlier in this report, is presented below:

Renter Households, by Income, by Size

|     | 2023 | \$        |          |          |          | 2023     |          |           |       |
|-----|------|-----------|----------|----------|----------|----------|----------|-----------|-------|
| Min |      | Max       | 1 Person | 2 Person | 3 Person | 4 Person | 5 Person | 6+ Person | Total |
| \$0 | to   | \$9,999   | 778      | 266      | 142      | 56       | 16       | 2         | 1,260 |
| \$0 | to   | \$19,999  | 1,805    | 626      | 286      | 96       | 39       | 7         | 2,858 |
| \$0 | to   | \$29,999  | 2,425    | 1,083    | 473      | 207      | 100      | 33        | 4,321 |
| \$0 | to   | \$39,999  | 2,867    | 1,319    | 635      | 276      | 157      | 54        | 5,308 |

# Demand Estimate, 3-Bedroom, Restricted, 60% of AMI

In this section we estimate demand for the 3-Bedroom / Restricted / 60% of AMI units at the subject property. Our analysis assumes a total of 23 units, 23 of which are anticipated to be vacant on market entry in 2023. Our analysis assumes a 35% income qualification ratio and 5-person households.

| Unit Details                 |                   |  |  |  |  |  |  |
|------------------------------|-------------------|--|--|--|--|--|--|

Demand Estimate

1,052

Our analysis suggests demand for a total of 1,052 size- and income-qualified units in the market area.

Please note: This unit-level demand estimate does not account for income band overlap with other units. Project-level demand estimates taking these factors into consideration will be developed later.

# Demand Estimate, Restricted, 60% of AMI

In this section we account for income-band overlap and develop a demand estimate for the units restricted to 60% of AMI at the subject property.

| Renter | Households. | by Income | hy Size |
|--------|-------------|-----------|---------|
|        |             |           |         |

Demand Estimate

1,052

Our analysis suggests demand for a total of 1,052 size- and income-qualified units in the market area.

Please note: This demand estimate does not account for income band overlap at the project level. A demand estimate taking this into consideration will be developed later.

## **Demand Estimate**

In this section, we derive our overburdened demand and capture rate estimates for the subject property. Our analysis, which begins with the income-qualified renter household estimates developed above, is found below.

|     | Income Qualified Renter Households |     |     |     |       |     |     |     |  |
|-----|------------------------------------|-----|-----|-----|-------|-----|-----|-----|--|
|     | Sub                                | 30% | 40% | 50% | 60%   | 70% | 80% | Mkt |  |
| Tot |                                    |     |     |     | 1,052 |     |     |     |  |

The next step in our analysis is to account for 2 years of growth to estimate the demand stemming from new income qualified rental households. Our estimates are found below.

Annual Renter Household Growth Rate
-0.1%

|     | New Rental Households |     |     |     |     |     |     |     |  |
|-----|-----------------------|-----|-----|-----|-----|-----|-----|-----|--|
|     | Sub                   | 30% | 40% | 50% | 60% | 70% | 80% | Mkt |  |
| Tot |                       |     |     |     | -2  |     |     |     |  |

The next step in our analysis is to estimate existing demand stemming from income-qualified overburdened renter households in this market area. Our estimates are found below.

|     |       |     | Overburd      | ened Renter H | ouseholds    |     |     |     |  |  |
|-----|-------|-----|---------------|---------------|--------------|-----|-----|-----|--|--|
|     | 26.0% |     |               |               |              |     |     |     |  |  |
|     |       |     | Existing Hous | eholds - Rent | Overburdened |     |     |     |  |  |
|     | Sub   | 30% | 40%           | 50%           | 60%          | 70% | 80% | Mkt |  |  |
| Tot |       |     |               |               | 274          |     |     |     |  |  |

The next step in our analysis is to estimate existing demand stemming from income-qualified substandard renter households in this market area. Our estimates are found below.

|                                   |     |     | ouseholds | _    |     |     |     |     |  |
|-----------------------------------|-----|-----|-----------|------|-----|-----|-----|-----|--|
|                                   |     |     |           | 3.5% |     |     |     |     |  |
|                                   |     |     |           |      |     |     |     |     |  |
| Existing Households - Substandard |     |     |           |      |     |     |     |     |  |
|                                   | Sub | 30% | 40%       | 50%  | 60% | 70% | 80% | Mkt |  |
| Tot                               |     |     |           |      | 36  |     |     |     |  |

The next step in our analysis is to account for elderly homeowners likely to convert to rental housing. This component may not comprise more than 20 percent of total demand. Our estimates are found below.

| <br>Elderly Homeowners Likely to Convert to Rental Housing |     |     |     |     |     |     |     |     |
|--|-----|-----|-----|-----|-----|-----|-----|-----|
|  | Sub | 30% | 40% | 50% | 60% | 70% | 80% | Mkt |
| Tot  |     |     |     |     |     |     |     |     |

The next step in our analysis is to account for existing qualifying tenants likely to remain after renovation. Our estimates are found below.

| Subject Property Units (Total) |     |                             |                 |                  |                |           |     |     |  |
|--------------------------------|-----|-----------------------------|-----------------|------------------|----------------|-----------|-----|-----|--|
|                                | Sub | 30% 40% 50% 60% 70% 80% Mkt |                 |                  |                |           |     |     |  |
| Tot                            |     |                             |                 |                  | 23             |           |     |     |  |
|                                |     | Existing (                  | Qualifying Tena | ants Likely to F | Remain after R | enovation |     |     |  |
|                                | Sub | 30%                         | 40%             | 50%              | 60%            | 70%       | 80% | Mkt |  |
| Tot                            |     |                             |                 |                  |                |           |     |     |  |

The next step in our analysis is to tally up total demand for the subject property. Our estimates are found below.

|     |     |     |     | Total Demand |     |     |     |     |
|-----|-----|-----|-----|--------------|-----|-----|-----|-----|
|     | Sub | 30% | 40% | 50%          | 60% | 70% | 80% | Mkt |
| Tot |     |     |     |              | 308 |     |     |     |

The next step in our analysis is to tabulate the number of vacant competing & pipeline units in the market area by unit/income type. This information will be used to further refine our capture rate estimate for the subject property. A table showing the distribution of vacant competing & pipeline units is found below.

|     |     |     | Vacant Co | mpeting & Pip | eline Units |     |     |     |
|-----|-----|-----|-----------|---------------|-------------|-----|-----|-----|
|     | Sub | 30% | 40%       | 50%           | 60%         | 70% | 80% | Mkt |
| Tot |     |     |           |               | 33          |     |     |     |

The next step in our analysis is to subtract the number of vacant competing & pipeline units from total demand to arrive at a net demand estimate for the subject property. Our estimates are found below.

| Net Demand (Total Demand - Vacant Competing & Pipeline Units) |     |     |     |     |     |     |     |     |
|---|-----|-----|-----|-----|-----|-----|-----|-----|
|   | Sub | 30% | 40% | 50% | 60% | 70% | 80% | Mkt |
| Tot   |     |     |     |     | 275 |     |     |     |

The next step in our analysis is to compute the capture rate for the project. For purposes of this computation, we define capture rate as the total number of subject property units divided by net demand. Underwriters often utilize capture rate limits of 10 to 20 percent using this methodology. Our estimates are presented below:

| _ | Capture Rates (Subject Property Units / Net Demand) |     |     |     |     |      |     |     |     |
|---|---|-----|-----|-----|-----|------|-----|-----|-----|
|   |   | Sub | 30% | 40% | 50% | 60%  | 70% | 80% | Mkt |
|   | Tot   |     |     |     |     | 8.3% |     |     |     |

Our findings are summarized below.

| Project-Wide Capture Rate - LIHTC Units  | 8.3%     |
|--|----------|
| Project-Wide Capture Rate - Market Units |          |
| Project-Wide Capture Rate - All Units    | 8.3%     |
| Project-Wide Absorption Period (Months)  | 2 months |

Please note: Project-wide capture rate estimates do not account for income band overlap at the project level.

## Interview Notes

| Person Interviewed | Ms. Kim, Manager |
|--------------------|------------------|
| Phone Number       | (423) 797-8511   |
| Interview Date     | 01-Feb-23        |
| Interviewed By     | JS               |

Contact advised some units have ceramic tile and they are updating as they become available. Also own Pinehedge Condominiums. In 2013, contact advised that 4 out of the 5 buildings have new roofs and this has been completed during the last 9 years. Property was sold in December, 2021 to Magpie property. Ms. Kim, Manager at the property

## Interview Notes

| Person Interviewed | Ms. Kathy Kestner, Owner |
|--------------------|--------------------------|
| Phone Number       | (276) 676-3366           |
| Interview Date     | 24-Jan-22                |
| Interviewed By     | DFR                      |

In 2006, manager reported this as a tax credit property, but we were unable to locate it on the TC/Bond lists. In 2015 the contact advised this property is not Tax Credit, but is a VHDA property. Ms. Kathy advised during our January, 2022 survey that she no longer owns this property. We were unable to reach this property during our February, 2023 study,

Thomas Jefferson Senior Apartments is an existing multifamily development located at 501 Mary Street in Bristol, Virginia. The property, which consists of 30 apartment units, was originally constructed in 1892. This property is currently operated as a rent restricted property. The property currently stands at 100 percent occupancy.

#### STATEMENT OF ASSUMPTIONS & LIMITING CONDITIONS

- The title to the subject property is merchantable, and the property is free and clear of all liens and encumbrances, except as noted.
- No liability is assumed for matters legal in nature.
- Ownership and management are assumed to be in competent and responsible hands.
- No survey has been made by the appraiser. Dimensions are as supplied by others and are assumed to be correct.
- The report was prepared for the purpose so stated and should not be used for any other reason.
- All direct and indirect information supplied by the owner and their representatives concerning the subject property is assumed to be true and accurate.
- No responsibility is assumed for information supplied by others and such information is believed to be reliable and correct. This includes zoning and tax information provided by Municipal officials.
- The signatories shall not be required to give testimony or attend court or be at any governmental hearing with respect to the subject property unless prior arrangements have been made with the client.
- Disclosure of the contents of this report is governed by the By-Laws and Regulations of the Appraisal Institute.
- The legal description is assumed to be accurate.
- This report specifically assumes that there are no site, subsoil, or building contaminates present resulting from residual substances or construction materials, such as asbestos, radon gas, PCB, etc. Should any of these factors exist, the appraiser reserves the right to review these findings, review the value estimates, and change the estimates, if deemed necessary.
- The Americans with Disabilities Act (ADA) became effective January 26, 1992. We have not made a specific compliance survey and analysis of this property to determine whether or not it is in conformity with
- This analysis specifically assumes that the subject property is operated as described in this report.
- This analysis specifically assumes that the subject property is constructed/rehabilitated as described in this report.
- This analysis specifically assumes that the subject property is financed as described in this report.
- This analysis specifically assumes the timing set forth in this report.

#### **CERTIFICATION**

I certify that, to the best of my knowledge and belief:

- The statements of fact contained in this report are true and correct.
- The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
- I have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved.
- I performed a market study for the subject property in March 2023.
- I have no bias with respect to the property that is the subject of this report or to the parties involved with this assignment.
- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurence of a subsequent event directly related to the intended use of the appraisal.
- The reported analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the requirements of the Uniform Standards of Professional Appraisal Practice.
- I made a personal inspection of the property that is the subject of this report.
- No one provided significant real property appraisal assistance to the person signing this certification.

  Debbie Rucker (Allen & Associates Consulting) assisted in compiling the data used in this report.
- The reported analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the requirements of the Code of Professional Ethics and Standards of Professional Appraisal Practice of the Appraisal Institute.
- The use of this report is subject to the requirements of the Appraisal Institute relating to review by its duly authorized representatives.
- As of the date of this report, I have completed the Standards and Ethics Education Requirements for Members of the Appraisal Institute.
- I am presently licensed in good standing as a Certified General Real Estate Appraiser in the states of Delaware, Georgia, Maryland, North Carolina, South Carolina, and Virginia, allowing me to appraise all types of real estate.

Respectfully submitted:

ALLEN & ASSOCIATES CONSULTING, INC.

Jeff Carroll

#### VHDA CERTIFICATION

I affirm the following:

- 1) I have made a physical inspection of the site and market area.
- 2) The appropriate information has been used in the comprehensive evaluation of the need and demand for the proposed rental units.
- 3) To the best of my knowledge the market can support the demand shown in this study. I understand that any misrepresentation in this statement may result in the denial of participation in the Low Income Housing Tax Credit Program in Virginia as administered by the VHDA.
- 4) Neither I nor anyone at my firm has any interest in the proposed development or a relationship with the ownership entity.
- 5) Neither I nor anyone at my firm nor anyone acting on behalf of my firm in connection with the preparation of this report has communicated to others that my firm is representing VHDA or in any way acting for, at the request of, or on behalf of VHDA.
- 6) Compensation for my services is not contingent upon this development receiving a LIHTC reservation or allocation.

<u>July 22, 2023</u>

Jeff Carroll Date

#### NCHMA MARKET STUDY INDEX

**Introduction**: Members of the National Council of Housing Market Analysts provide the following checklist referencing various components necessary to conduct a comprehensive market study for rental housing. By completing the following checklist, the NCHMA Analyst certifies that he or she has performed all necessary work to support the conclusions included within the comprehensive market study. By completion of this checklist, the analyst asserts that he/she has completed all required items per section.

**MISCELLANEOUS** 

#### **QUALIFICATIONS**

Allen & Associates Consulting is a real estate advisory firm specializing in affordable housing. Practice areas include low-income housing tax credits, tax-exempt bond transactions, HUD assisted and financed multifamily, USDA-RD assisted and financed properties, public housing, historic tax credits, conventional multifamily, and manufactured housing. Services include development consulting, rent comparability studies, market analysis, feasibility studies, appraisals, capital needs assessments, and utility studies.

Allen & Associates Consulting and its sister organization Allen & Associates Appraisal maintain offices in Charlotte, North Carolina and Detroit, Michigan, respectively. Allen & Associates is approved to provide its services throughout the United States.

The following is a listing of key personnel for Allen & Associates Consulting:

## Jeffrey B. Carroll

Jeffrey B. Carroll is President of Allen & Associates Consulting. Since 2000, Mr. Carroll has completed over 3000 development consulting assignments in 46 states. Major projects include:

- *Market Feasibility* Completed market studies for 13 proposed tax credit apartment developments on behalf of the Georgia Department of Community Affairs. The portfolio included 5 family and 8 senior communities. Our analysis identified the 4 best deals for the housing finance agency to consider funding.
- *Valuation* Developed a disposition plan for a 30-property portfolio of apartments on behalf of a private owner. The 921-unit portfolio (located in MD, DE, PA and VA) was valued at \$23 million. Our client relied on our valuations and advice to maximize sales proceeds for the portfolio.
- Capital Needs Assessments Completed capital needs assessments for an 8property portfolio of RD-financed apartments on behalf of a private developer.
  The portfolio (located in FL) included 6 family and 2 senior communities. Our
  client utilized our assessments to develop a scope of work for the proposed
  acquisition and renovation of the 214-unit portfolio.
- Utility Allowance Studies Completed utility allowance studies for a portfolio of tax credit apartments on behalf of a large national owner/developer. The portfolio (located in CT, DC, IL, IN, MA, NC, OH, PA and VA) included 31 properties. Our client utilized our research to maximize rents and net operating income for the portfolio.
- Underwriting Conducted a financial review on behalf of a local housing authority for the proposed redevelopment of a vacant historic textile mill into loft apartments. Our client had been asked to issue \$4 million in tax-exempt bonds for

the \$15 million project. Our assistance in underwriting the transaction resulted in the green light for the development.

Mr. Carroll is a certified general appraiser, licensed to appraise real estate in the states of Delaware, Georgia, Maryland, North Carolina, South Carolina and Virginia. Mr. Carroll is also a designated member of the Appraisal Institute (MAI).

Mr. Carroll is a peer-reviewed member of the National Council of Housing Market Analysts, where he served on the Executive Committee and chaired the Data and Ethics Committees.

In addition, Mr. Carroll has also served as a market study reviewer for the Georgia and Michigan housing finance agencies.

Mr. Carroll has written articles on affordable housing, development, property management, market feasibility, and financial analysis for <u>Urban Land</u> magazine, <u>The Journal of Property Management</u>, <u>Community Management</u> magazine, <u>Merchandiser magazine</u>, <u>HousingThink</u>, and a publication of the Texas A&M Real Estate Research Center known as Terra Grande.

Mr. Carroll has conducted seminars on affordable housing, development, property management, market feasibility, and financial analysis for the American Planning Association, Community Management magazine, the Georgia Department of Community Affairs, the Manufactured Housing Institute, the National Association of State and Local Equity Funds, the Virginia Community Development Corporation, and the National Council of Affordable Housing Market Analysts.

Mr. Carroll is also an experienced developer and property manager. His experience includes the development of tax credit apartment communities, conventional market rate apartments, manufactured home communities, and single-family subdivisions. He has also managed a portfolio of apartment complexes and manufactured home communities.

The following is a summary of Mr. Carroll's relevant educational background:

## **Summary**

Specialist in the development of workforce housing utilizing structural insulated exterior wall panels. Current activities include:

- Founder of Tartan Residential, a firm specializing in the development of workforce housing utilizing structural insulated exterior wall panels. Panelization delivers cost savings/benefits that put newly-constructed units within reach for workforce housing renters.
- Co-Founder of the Workforce Housing Development Corporation, a non-profit firm that provides technical assistance, soft debt, and equity financing to developers building workforce housing with structural insulated exterior wall panels. Participating projects are positioned to deliver a triple bottom line (financial, social, environmental) to investors.
- Founder of Allen & Associates Consulting, a real estate advisory firm specializing in workforce and affordable housing.

## **Current Activities**

#### President | Tartan Residential, Inc. | Charlotte, NC | 1997 - present

Founder of Tartan Residential, a firm specializing in the development of workforce housing utilizing structural insulated exterior wall panels. Panelization delivers cost savings/benefits that put newly-constructed units within reach for workforce housing renters. Major projects include:

- Buchanan's Crossing Subdivision A 40-unit duplex development serving families in Kansas City, Kansas. The estimated cost of this three-phase project is \$11.0 million. This mixed income project, targeting families between 50% and 120% of area median income, is financed with a mixture of conventional debt, conventional equity, and tax credit equity. Construction commenced in 2016.
- Davidson's Landing A proposed 115-unit garden apartment community serving families in Kansas City, Kansas. The estimated cost of this project is \$26 million. This workforce housing development project, which targets families between 30% and 80% of area median income, is financed with tax-exempt bonds. Construction commenced in 2021.
- Johnston Farms A proposed 120-unit apartment community serving families in Rock Hill, South Carolina. The estimated cost of this project is \$33 million. This workforce housing development project, which targets families between 50% and 100% of area median income, is proposed to be financed with 501c3 bonds. Construction to begin in 2022.
- Dunbar Place A proposed 100-unit apartment community serving families in Rock Hill, South Carolina. The estimated cost of this project is \$25 million. This workforce housing development project, which targets families between 50% and 80% of area median income, is proposed to be financed with LIHTCs and tax-exempt bonds. Secured the entitlements and initiated the bond inducement process prior to selling to a large non-profit in 2021.
- McLelland Village A proposed 96-unit garden apartment community serving families in Mooresville, North Carolina. The estimated cost of this project is \$25 million. This workforce housing development project, which targets families between 50% and 80% of area median income, is proposed to be financed with LIHTCs and tax-exempt bonds. Secured the entitlements and initiated the bond inducement process prior to selling to a large non-profit in 2021.

<u>Co-Founder | Workforce Housing Development Corporation, Inc. | Charlotte, NC | 2019 - present</u>
Co-Founder and non-voting Advisory Board Member of the Workforce Housing Development Corporation, a non-profit firm that provides technical assistance, soft debt, and equity financing to developers of workforce housing. Major projects include:

- Attracted an affordable housing REIT to provide private equity for as many as 100 workforce housing developments over the next 10 years.
- Developed an intern program known as Workforce Housing University. Hosted 3 interns during the Summer of 2022 introducing them to the development, construction, management, and finance of rental workforce housing. The program was a huge success.
- Developing an exchange program with a twofold purpose: (1) to notify participating employers of vacant units at participating developments, and (2) to notify residents at participating developments of job openings with participating employers.
- Establishing a training incentive program for residents at participating developments seeking to work in manufacturing, the trades, and other select professions.
- Developing a comprehensive set of planning tools for workforce housing developers to utilize in land use, zoning, and entitlement matters.

## President | Allen & Associates Consulting, Inc. | Charlotte, NC | 2000 - present

Founder of Allen & Associates Consulting, a real estate advisory firm specializing in workforce and affordable housing. Practice areas include low-income housing tax credits, tax-exempt bond transactions, HUD assisted and financed multifamily, USDA-RD assisted and financed properties, public housing, historic tax credits, conventional multifamily, and factory-built housing. Services include development consulting, feasibility studies, market analysis, rent comparability studies, appraisals, capital needs assessments, and utility studies. Performed over 3800 development consulting assignments in 46 states since 2000.

## **Prior Experience**

#### Co-Founder | Delphin Properties LLC | Charlotte, NC | 1998 - present

Co-founder of Delphin Properties, a firm specializing in the acquisition and development of manufactured home communities. This entity is currently inactive. Major projects included:

- Crystal Lakes A 338-unit manufactured home community serving seniors in Fort Myers, Florida.
   Purchased the partially-constructed development in 1998, completed construction, and sold it in 2001 for a \$1 million profit.
- Mahler's Glen A 348-unit development originally planned as a manufactured home community serving families in Garner, North Carolina. Secured zoning and site plan approval, engineered the property (including a private wastewater treatment facility), and sold it to a national homebuilder in 2000 for a \$2 million profit.
- Beacon Wood A 363-unit development originally planned as a manufactured home community serving families in Crockery Township, Michigan. Secured zoning and site plan approval, engineered the property, and sold it to a regional homebuilder in 2001 for a \$1 million profit.

<u>Development Director | Clayton, Williams & Sherwood, Inc. | Austin, TX | 1995 - 1997</u> Development Director for Clayton, Williams & Sherwood, a privately-owned operator of manufactured home communities and apartment complexes. Major projects included:

- Multifamily Development Managed the construction and lease-up of two apartment communities consisting of 564 units and valued at \$38 million. Each property leased up in excess of 25 units per month.
- Manufactured Home Community Development Put together development plans for 4 landlease manufactured home communities consisting of 1800 units and valued at \$54 million.
- Modular Home Subdivision Development Put together development plans for 2 fee simple modular home subdivisions consisting of 200 units and valued at \$20 million.

#### Assistant to the President | Southwest Property Trust | Dallas, TX | 1993 - 1995

Assistant to the President for Southwest Property Trust, a large apartment REIT. Provided support to management personnel operating a 12,000-unit apartment portfolio.

#### Investment Analyst/Manager | GE Capital | Dallas, TX | 1991 - 1993

Investment Analyst/Manager for GE Capital's Residential Construction Lending business. Assisted in the management of a \$500 million investment portfolio including 30 single family residential land development investments and 70 single family construction lines of credit.

Regional Manager | Clayton, Williams & Sherwood, Inc. | Newport Beach, CA | 1989 - 1991
Regional Manager for Clayton, Williams & Sherwood, a privately-owned operator of manufactured home communities and apartment complexes. Major projects included:

- Multifamily Management Management of a 1200-unit apartment portfolio valued at over \$72 million. Implemented a portfolio-wide 10 percent rent increase while cutting operating expenses 3 percent resulting in a \$7 million increase in portfolio value.
- Manufactured Home Community Management Management of a 1200-unit manufactured home community portfolio valued at over \$36 million. Implemented a 15 percent rent increase in a 500unit community resulting in a \$4 million increase in property value.

#### Manufacturing Management | Milliken & Company | Pendleton, SC | 1983 - 1986

Manufacturing Manager for Milliken & Company, a specialty textile manufacturer headquartered in Spartanburg, South Carolina. Assigned to a dyeing and finishing facility. Exposed to a wide range of manufacturing issues: facility layout, purchasing, scheduling, material handling, automation, process improvement, quality control, inventory management, logistics, personnel, safety, environmental, and customer service.

#### Education

Harvard Business School | MBA, General Management, Real Estate, Economics | 1986 - 1988 Graduated in 1988 with an MBA from Harvard Business School. Emphasis in General Management and Real Estate with a minor concentration in Economics. Educational highlights include:

- Conducted a study of the passenger tire industry in 1986. Evaluated Firestone's competitive
  position relative to other tiremakers. Observed that other manufacturers enjoyed a cost
  advantage over Firestone because of superior scale, better capacity utilization, and more
  accumulated experience in tire production. Concluded that Firestone should merge with another
  tiremaker to bolster its competitive position. One year after completing this study, Firestone was
  acquired by Bridgestone Japan's largest tiremaker.
- Performed financial analysis for a Boston-based tax credit syndicator to help pay for school.
   Evaluated two elderly tax credit deals that ultimately closed in 1989.

## Clemson University | BS, Engineering, Economics | 1978 - 1983

Graduated in 1983 with a BS in Engineering from Clemson University. Minor concentration in Economics. Honors included Dean's List and Alpha Lambda Delta honorary. Elected officer for Phi Delta Theta social fraternity. Awarded scholarship on Clemson's varsity wrestling team.

## **Certifications, Designations and Affiliations**
